Ultra Precision Collet Sets

RAPIDHOLD:
- Inch & Metric sizes
- Made with high quality Bearing Steel and heat treated for high flexibility and long life
- Made in DIN6499 - 0..0002" T.I.R.
- Wide clamping range with 0.02 - 0.039" collapsibility

REGO-FIX:
- High precision collets combine the advantages of DIN 6499/ISO 15488 A + B
- T.I.R. ≤ 5µm over the entire clamping range
- Clamping range from diameter 0.2mm up to 36mm

TECHNIKS:
- Made from high-carbon bearing steel and heat treated for improved flexibility and longer life
- .0002" T.I.R. or better
- Clamping range .039"

ER Steel Sealed Coolant Spring Collet

Rapidhold:
- Collet Accuracy: 0.0003" - 0.0004" T.I.R.
- Maximum allowable pressure - 1500 - 2000 PSI
- Made with spring steel

ETM:
- High pressure coolant supply up to 1450 PSI
- DIN6499
- Hard touch coating

Techniks:
- Sealed to 2000 PSI
- No plugs to fail
- Protects tool holder from contaminants

Rego Fix DM Collets
- T.I.R. 0.0002" or better - Guaranteed at 4D over full clamping range
- Seals coolant up to 2000 PSI
- Superior surface finish
- Lot traceability
- Patented design
- Easty to read size markings

ER Metric Steel Sealed Coolant Spring Collets

Rapidhold:
- Collet accuracy: 0.0003” - 0.0004” T.I.R.
- Maximum allowable pressure: 1500 - 2000 PSI
- Made with spring steel

Techniks:
- Sealed to 2000 PSI
- No plugs to fail
- Protects tool holder from contaminants

Rego Fix:
- Made to DIN 6499 / ISO 15488
- T.I.R. ≤6 µm over the entire clamping range
- Clamping range from 2.93 - 6.35mm diameter
- Metallic sealed up to 300 bar coolant pressure
- Clamping range smaller to the standard collets

ER System Clamping Nuts

- Hi-Q®/ER Clamping nuts with corrosion resistant surface are standard on all REGO-FIX® ER toolholders
- Hi-Q®/ERC Clamping nut is intended for use with the sealing disk system DS/ER and the coolant flush system KS/ER. These systems allow the use of all standard ER collets, ultra precision collets and tapping collets to be used in coolant applications. Up to 2000PSI Coolant pressure. Peripheral cooling of non-coolant through tools
- HI-Q®/ERC11 clamping nut is a one piece nut and disk system with built in o-ring seal for coolant through tools. Does not require sealing disks. Up to 2000PSI Coolant pressure. Intergrated seal prevents dirt and chips from entering collet
- HI-Q®/ERAX Clamping nut is used for floating chucks and other ER toolholders with internal thread
- HI-Q®/ERAXC / ERBC / ERMC Clamping nuts are intended for use with the sealing disk systems DS/ER and the cool flush system KS/ER. The disk system allows the use of all standard ER collets, ultra precision collets and the tapping collets for coolant through tools
- HI-Q®/ERB Clamping nut is a friction-bearing nut that offers the highest clamping force available
- HI-Q®/ERM Mini Clamping nut is recommended for use where minimal external diametes are important

Features:

- Collet locking to keep collet from coming out during assembly
- Balanced by design for high speed machining
- Special corrosion resistant treatment to redude friction between collet and nut, increases clamping force by up to 120%

ER Power Coat Coolant Nuts

- Increase holding power up to 75%
- Balanced to 25,000 RPM
- Reduce T.I.R. and extend tool life up to 20%
- Use with Rapidkut coolant Rings

Description	Collet Style	Order No.	Price
Use with Coolant Rings	ER16	**GM69ER16PC**	Price
Use with Coolant Rings	ER20	**GM69ER20PC**	Price
Use with Coolant Rings	ER25	**GM69ER25PC**	Price

ER System Collet Coolant Rings

Techniks:
- Seals up to 1,500 PSI
- Use with precision ER collets
- Seals collet pocket from contamination
- Use with Technik Power Coat coolant nuts

Rego-Fix:
- Seals up to 2,000 PSI
- Seals collet pocket from contamination
- Work with all REGO-FIX coolant nuts
- 0.5mm Sealing range per disk
- Made in Switzerland to ISO 9001/ISO 14001

ASSEMBLING: Insert the small diameter of the disk into the center of the coolant nut and apply even pressure until the disk is properly seated into the nut. The disk must be flush with the outside of the nut and the marking on the disk must be seen inside the nut

REMOVING: To remove the disk, simply press on the outside of the disk evenly until it snaps out

Briney Eccentric Bore Tool Holders

- Tru Position eccentric bore tool holders have a special proven grinding technique design that dramatically reduces total indicator runout (T.I.R.)
- Average .0001” concentricity finished tool holders with eccentric ID guaranteed .0002” (note tool must be installed)
- Tool pulls within .0001” of centerline once set screw is tightened
- Holders are offset .0003”
- ISO 9001 certified

RAPIDHOLD™ BT30 V-Flange End Mill Holders

- Produced according to AT3 specifications
- Tools are made of a high quality alloy steel
- End mill socket T.I.R. .0002”
- Through the spindle coolant capability
- Hole diameters are made in H5 class
- Dynamically balanced to G6.3 @ 20,000 RPM
- All balanced tools are supplied with QA certificate

TECHNIKS BT30 V-Flange End Mill Holders

- Precision machined to an Industry Leading H5 standard I.D. hole tolerance
- Balanced to 15,000 RPM to save spindle bearing life and the Taper is ground to AT3 standard for maximum spindle contact
- Each holder is lab certified with an individual report to ensure quality

CAT40 V-Flange End Mill Holders

- Precision machined to an Industry Leading H5 standard I.D. hole tolerance
- Balanced to 15,000 RPM to save spindle bearing life and the Taper is ground to AT3 standard for maximum spindle contact
- Each holder is lab certified with an individual report to ensure quality

RAPIDHOLD CAT50 V-Flange End Mill Holders

- Produced according to AT3 specifications
- Tools are made of a high quality alloy steel
- End mill socket T.I.R. .0002”
- Through the spindle coolant capability
- Hole diameters are made in H5 class
- Dynamically balanced to G6.3 @ 20,000 RPM
- All balanced tools are supplied with QA certificate

† Single End Endmills only

Briney NMTB End Mill Adapters

- Tru Position Design - A special eccentric grind technique reduces runout to .0002” when tool is installed into holder
- Twice the tool life you can get with any other end mill holder, plus half the tooling replacemnet expense because tools last longer due to even chip load and less chatter due to Briney`s special grind process
- Fewer passes to mill slots because of improved on-center rotation, saving time and improving machining quality
- Black oxide prior to finish grind

Briney NMTB Jacobs Taper Adapters

- Built from certified materials that can be traced backed to the mill
- The tapers are gournd to an AT2 to AT3 resuling in maximum spindle contact
- Long life due to internal specialized heat treat processess
- ISO 9001:2008 policies and practices
- .0002” concentricty or less from taper shank to arbor diameter
- Black oxide prior to finish grind

PARLEC V-Flange Morse Taper Adapters

- Constructed of alloy steel
- Hardened to RC 56-60
- Shiny taper with black oxide finish
- Taper T.I.R. .0002"
- Parsymmetry™ design for high-speed operation
- Plastic bumper protects spindle and holder during tool changes - Available on NMTB 40 and 50 holders only

Capto-Compatible ER Chucks

- Balance to 25,000 RPM at G2.5
- T.I.R. 0.0001” or better
- PowerCOAT Nut Included
- Compatible with the Capto tool system
- Techniks products are not affiliated with or endorsed by Sandvik AB

New!

- Handles a wide range of machining tasks without having to buy dedicated toolholders
- Simply choose the right size collet for the job, set tool depth, and tighten the collet nut and pull stud to the proper torque using a torque wrench and tightening fixutre
- Certified for accuracy and balance
- Each holder comes with a complete lab report

SCHUNK Milling Chuck Holders

TENDO Benifits:

- Maximum true running and repeat accuracy greater than 0.003 mm
- Excellent vibration damping
- Improved surface quality
- Prevents chipping of tool cutting edge
- Versatile clamping range thanks to intermediate sleeves
- Accurate length presetting axially or radially
- Easy handling - without peripheral equipment tools are changed within seconds
- Precision-balanced as standard G 2.5 / 25000 1/min.

SINO Benefits:

- Universal toolholders is designed for multi-purpose use based on the expansion technology
- Vibration-damping design
- Micro-blowouts at the lip of the tool are reduced to a minimum.
- Improved surface quality of the workpiece
- Flexible clamping range due to use of intermediate sleeves
- Concentricity 0.005 mm measured in the clamping bore
- Precision-balanced as standard G 6.3 / 15000 1/min

HAIMER CAT40, CAT50 Shrink Chucks - Standard Version

- Shrink fit chuck suitable to all kind of shrink fit units
- Fine balanced to G2.5 at 25,000 RPM
- Certified AT3 Taper
- High runout accuracy 3µm
- Heat resistant hot-working steel
- Hardened 54-2 HRC
- For HSS and solid carbide tools
- Shank tolerance h6
- With threaded holes in order to balance with balancing screws
- Cool Jet coolant bores that can be sealed included
- Made in Germany

HAIMER CAT40, CAT50 Power Shrink Chucks

The Power Shrink Chuck is the shrink fit chuck for highest machining capacity in high-speed manufacturing. The optimized design combines high rigidity with dampening vibrations, therefore giving more protection to machines, spindles and tools.

- Shrink fit chuck suitable to all inductive shrink fit units
- Precesion AT3 Tolerance Shank
- Balanced to G2.5 at 25,000 RPM or U

Briney Shrink Fit Tool Holders

One of the original pioneers that introduced Shrink-Fit Tool Holders to the world now offer you choices. Whichever it may be, the original USA-ANSI Design Shrink-Fit Tool Holder or the newer European-DIN Design Shrink-Fit Tool Holder.

By Manufacturing both designs, Briney is instantly compatiable with our competitor's induction units and accessories.

USA-ANSI Standard

- 3° Nose angle
- Shorter bearing surface
- No back-up screw
- Superior holding force
- Consistent wall thickness throughout entire design
- **DIN Standard Available**

MADE IN THE USA

PARLEC Shrink Fit Tool Holders

- Improved concentricity
- Improved balance design with no moving pieces
- Low Centrifugal Forces due to low holder mass
- For maximum gripping power with exceptional concentricity
- Concentricity of ≤.0001" with tool shrunk in holder
- Chip load distributed evenly along cutting edge of tool which results in longer tool life
- Constructed of double tempered Tool Steel for exceptional durability and cycle life. With proper use, toolholder life should exceed that of standard end mill holders
- Tool is gripped 360° along the entire length of bore resulting in an evenly distributed clamping force
- Short projections are possible because no mechanical clamping devices are used. This results in greater rigidity and resistance to bending
- Simple and fast to use. The total time elapsed to remove one cutting tool and insert another is less than 10 seconds
- Through-spindle coolant capability
- Coolant through holders require no special backup screws or seals. The interference fit between the ID of the tool holder and cutting tool shank forms the seal, preventing the coolant from flowing anywhere else except through the coolant grooves
- The use of Heat Shrink Tooling allows for greater speeds and feeds, better finishes, increased tool life, and increased productivity due to its High Speed Machining capability and simplicity of use

Retention Knobs

- High Torque (HT) and High Torque High Strength (HTHS0 retention knobs will increase production 10 to 40%, reduce set-up times, reduce polishing times, increase spindle life, improve finishes and increase tool life
- HT knobs are manufactured from AISI 8620H material
- HS and HTSHS knobs are made from AISI 9310H
- HT and HTHS knobs will fit any toolholder made to industry standards
- HT and HTHS retentionknbos should be installed according to the manufacturer's torque chart provided with each knob using a retention knob socket and torque wrench
- Marked with serieal numbers

Retention Knob Sockets

- Sockets aid in the installation and removal of Retention Knobs
- Ideal tightness is achieved, without rounding off the corners of the Retention Knob
- Note: Some Retention Knobs have mixed standards - Check the shoulder and Wrench Sizes carefully when selecting a Socket to fit other Retention Knobs not listed above
- Lifetime Guarantee
- Saves Time
- Sockets have 1/2" drive – ideal tightness is achieved

RAPIDHOLD™ CNC Tightening Fixtures

- Multiple usage on toolholder shank CAT, BT, NMTB & ISO
- Enables strong gripping power of cutting tools
- Access both ends of toolholders simultaneously
- Secures maximum protection of toolholder
- Tools can be mounted in vertical and horizontal positions
- High quality compact and rigid design for mounting on work table or tool cart

Piston Type Tool Post:
- Instant changing from one operation to another.
- A knurled nut on each tool holder provides for exact height adjustment, entirely eliminating the use of shims.

Wedge Type Tool Post:
- Wedge type tool posts are precision engineered to assure repetitive accuracy.

Interchangable with Aloris, Yuasa, and Phase II:
- All working parts hardened & ground
- Maximum rigidity for chatter-free performance
- No time wasted with shims
- Increases productivity of all lathe operations
- Completely sealed for maintenance-free operation
- Change tools in seconds

No. 1 Turning and Facing Tool Holder:
- Takes various sizes of bits
- Turning and facing tools can be locked in together

No. 2 Boring, Turning and Facing Tool Holder:
- "V" groove holds round shank boring bars and tools, as well as square tool bits

No. 4 & No. 41 Larger Capacity Heavy Duty Boring Bar Tool Holder:
- Equipped with a split bushing to accommodate a boring bar of smaller diameter

No. 5 & No. 53 Larger Taper Morse Taper Tool Holder:
- Drills with carriage by using power feed instead of tailstock

No. 7 Universal Parting Blade Tool Holder:
- For bevel as well as T-cut Blades
- Enables you to cut-off close to chuck

No. 10 Knurling, Facing and Turning Tool Holder:
- For turning and facing, as well as knurling
- Supplied with a set of high speed medium diamond knurls

- Also includes 1 Square Shank Tool, 1 Boring Bar, 1 Cut-off Blade, 1 Internal Threading Bar, and 5 inserts

Tooling & Carbide Inserts Included

Swing (in.)	Set Includes	Order No.	Price
13 to 15	No. 1, 2, 7-71C, 881	**GG35QITP30FTB**	Price
14 to 17	No. 1, 2, 7-71C, 881	**GG35QITP35FTB**	Price

Swing (in.)	Set Includes	Order No.	Price
16 to 20	No. 1, 2, 7-71C, 881	**GG35QITP40FTB**	Price
Up to 12	No. 1, 2, 7-71C, 881	**GG35QITP25FTB**	Price

Triple Action Wedge Lock Tool Posts

- Zero backlash
- Precise repeatablity within .0001
- 15° Locking handle position adjustment
- Industry standard interchangeable holders

Modular Knurling Tools

Cutting Type:
- Exerts less pressure on the part
- Creates chips
- Runs at higher speeds and feeds than forming type knurling tools
- Use sharp corner knurl wheels
- For diamond patterns only

Forming Type:
- Exerts a lot of pressure on the part
- Displaces material to form the knurl
- Straddle type pinches the material with top and bottom wheels and eliminates side pressure
- Ideal for long slender, thin walled, unsupported or poorly supported parts; or whenever part deflection due to side pressure is a concern
- On all forming type knurling tools use beveled edge knurl wheels

Warnings:
- **SCKN, SSCK, SWFKT & HDSWFKT** - May cause deflections on small part diameters, and too much pressure on large diameters
- **KTW109 (Heavy Duty & Shoulder)** - This tool has the capability to adjust the wheels until they touch, but physically applying a knurl on small diameters may not be possible
- **KTO109-40 & KTW109-40** - Physically applying a knurl on small diameters may not be possible

Style - Double Wheel Forming - Diameter Range Greater than 5/16" Includes - Set of Beveled diagonal high speed beveled TiN coated knurl wheels, 25 TPI for a male diamond pattern

Item	Description	Model No.	Shank Size	Knurl Wheel Type	Knurl Pin Set No.	Order No.	Price

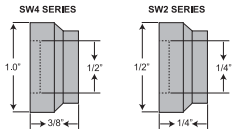
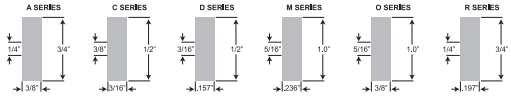
Dorian Tool Knurls

MADE IN THE USA





- "SW" knurling wheels are technically designed to knurl against a square shoulder
- With super precise workmanship, the wheels are made of heat treated High Cobalt Steel to withstand severe knurling operation
- Knurl wheels are Titanium Nitrating coated to reduce the co-efficient of friction when knurling, increasing the quality and the force of knurling as well as the life of the knurl wheels
- All SW Series knurl wheels are available only in cobalt and tin coated
- Tools Used On "SW2" Series: SCNC-37, 50, 162-1-2, CNC-75, 100, 125-1-2, SCNC-37K, 50, 162-6-2, SCNCKH-1-2, SCNCKH-6-2, CNCKH-1-2, SSCK38-2, SSCK-50-2
- Tools Used On "SW4" Series: SSCK-75-4, SSCK-100-4, SSCK-125-4, KTW109-75-2-4, KTW109-100-2-4, KTW109-100-3-4, KTW109-125-3-4
- Circular Pitch Knurls are made to extremely high standards from the finest materials available
- Knurls are individually hob cut and lapped to a smooth hard finish to give longer life and impart a smooth clean surface to the knurled part
- Knurls available in High Speed, Cobalt, TIC/N - Coated, beveled, and diametral pitch
- Tools Used On "D" Series: SCNC-37-7-D, SCNC-50-7-D, SCNC-162-7-3, SCNCKH-7-D, 3SHKT-50-D, 3SHKT-162-D, SCK5-50-D
- Tools Used On "M" Series: CNC-75, 100, 125-3-M, CNCKH-3-M, SCK-75, 100, 125-M, 3SHKT-75, 100, 125-M
- Tools Used On "O" Series: CNC-75-5-O, CNC-100-5-O, CNC-125-5-O, CNCKH-5-O
- Tools Used On "R" Series: CNC-75-2-4, CNC-100-2-4, CNC-125-2-4, CNCKH-2, CNC-75-7, CNC-100-7, CNC-125-7

EAGLE ROCK TECHNOLOGIES, INC. Bump Type A1-30 Solid & Round Shank Knurling Tools

A1-30 Solid, 1 Pc., CNC Shank Bump Type Knurling Tool:

- Our exclusive offset shank allows for virtually no turret overhang of the knurls
- Since the knurl head is on the side of the holder, you can insert the tool in your turret with as little (or as much) overhang as you want
- Head is self-centering to accommodate for any misalignment
- Includes one set of a Medium pitch, Diamond pattern (BL and BR) knurls

A1-30 Round CNC Shank Bump Type Knurling Tool:

- Head is self-centering to accommodate for any misalignment
- Can also be used for Internal Knurling
- Includes one set of Medium pitch, Diamond pattern (BL and BR) knurls

Circular Pitch Knurls

- The circular Pitch Knurl System is the older system and has been in use many years
- The spacing of the teeth is measured by the number of teeth per inch (TPI) around the circumference
- Knurling can be done with many types of holders made for knurling or with any holder (or machine) made for thread rolling

DUMORE CORPORATION Quality is our legacy Model 14 - Tool Post Grinder with Integral Spindle 1/4HP

Internal & External Grinding Capabilities

MADE IN THE USA

- Designed specifically for internal and external grinding on home-shop lathes
- Supplied with 1/8" chuck mounted wheels, pulley, belt, mounting post, tee-bolt, wheel collars, general purpose wheels and steel carrying case
- For lathes up to 7" swing
- Grinding speeds 10,000 RPM and 22,500 RPM
- External grinding capacity 1/8" - 2" diameter wheels
- Internal grinding capacity: 1/2" min., 2-1/4" max depth
- Tool Post Grinder complete, 115 V AC/DC

Order No.	Price
RL9514011	Price

DUMORE CORPORATION Quality is our legacy External & Internal Grinding Kit

Kit Includes:

- Tool post grinder
- 8 Insert Spindles: 5T-200, TX, TC, 5N-158, TN-3, TN-4, TN-5 & TN-6
- 3 External grinding wheels
- 4 Mounted wheels
- 2 Internal grinding wheels
- Diamond wheel dresser
- Pulleys
- Belts
- Carrying case

MADE IN THE USA

Motor	Order No.	Price
1/2 HP	**RL955750T**	Price
3/4 HP	**RL955775T**	Price

External Grinding Kit

Kit Includes:

- Tool post grinder
- External 5X-350 grinding spindle
- 3 General purpose grinding wheels
- Diamond wheel dresser
- Pulleys
- Belts
- Carrying case

MADE IN THE USA

Motor	Order No.	Price
1/2 HP	**RL955750X**	Price
3/4 HP	**RL955775X**	Price

Model 12 - Tool Post Grinder with Interchangeable Spindle - 1HP

MADE IN THE USA

- A natural for large heavy work and continuous operation
- Interchangeable spindles for external and internal grinding avaible
- 8" Diameter wheel capacity
- Flat-belt drive, vertical spindle adjustment
- Comes with pulleys, flat-belts, belt guard, mounting post, T-bolt, wheel guard and diamond dresser
- For lates with 20" or larger swing

Description	Order No.	Price
115V, 60Hz, Single Phace, AC Only	**RL9512011†**	Price
220/440V, 50/60 Hz, 3PH, AC Only	**RL9512022†**	Price

Model 57 - Tool Post Grinder with Interchangeable Spindle - 1/2HP & 3/4HP

- 6" Diameter external grinding wheel
- Internal grinding up to 18" deep at 1-7/8" diameter
- Comes with belts, pulleys, belt guard, T-bolt, mounting post, diamond dresser, wrench set and carrying case
- For lathes with swings from 9" to 20"

MADE IN THE USA

Style	Order No.	Price
1/2 HP Induction Motor, 115V, 60 Hz, AC Only	**RL9557021**	Price
3/4 HP Univeral Motor, 115V, AC/DC	**RL9557031**	Price

Model 25 - Tool Post Grinder with Interchangeable Spindle - 3HP

MADE IN THE USA

- Handles large external and surface grinding jobs by coverting any standard machine tool into a big capacity grinder
- Mounts on lathes 20" or larger, heavy duty milling machines, planers, boring mills, etc.
- Equipped with built-in magnetic starter, overload protector and grease-sealed bearings
- Holds up to 12" diameter wheels
- For internal grinding uses Series 12 spindles

Style	Order No.	Price
220V, 50/60 Hz, 3PH, AC Only	**RL9525022‡**	Price

Tool Post Spindles

- SPINDLE SELECTOR CHART (Must be ordered separately for Model 12, 25 & 57 Grinders)
- When ordering 12N internal and 12X external spindles for the Model 25 Grinder, order Adapter Kit Order No. 858-0035. Kit contains correct belts and pulleys.
- When ordering 25X external spindles for the Model 12 Grinder, order Adapter Kit Order No. 858-0034. Kit contains correct belts, pulleys and 12" wheel guard.

RAPIDHOLD™ Toolholder CNC Bushings

- **C Style Tool Holder Bushing:** Elongated slot, universal style, designed to fit all types of Set-screw configurations
- **J Style Tool Holder Bushing:** Two hole style requires precise alignment of set screws
- **B Style Tool Holder Bushing:** Split style, shorter length, clamp on flat; bushing collapses to hold tool
- **CV Style VDI Tool Holder Bushing:** Designed to fit the form E2 VDI boring bar holder
- Clearance holes to clamp directly on the tool
- Used to adapt drills, boring bars, and other tools

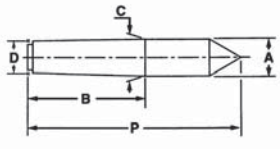
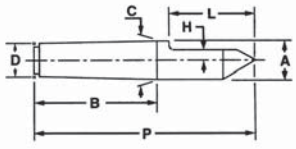
Riten High Speed & Carbide Tipped Dead Centers

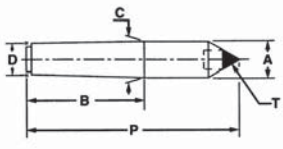
- Accuracy guaranteed to ±.00005
- Through-harded to 61-63 Rc for extra reginds
- Carbide tipped dead centers are harrdened only on the knockout ends
- Riten full service, repair, and guarantee apply
- Applying a Moly EP632 grease on the point will reduce friction and wear



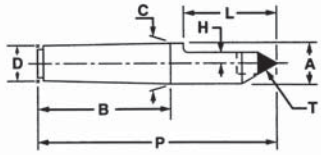
Style 1 - Steel Full Center



Style 2 - Steel Half Center



Style 3 - Carbide Tipped Full Center



Style 4 - Carbide Tipped Half Center

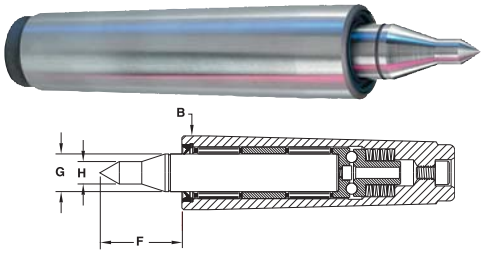
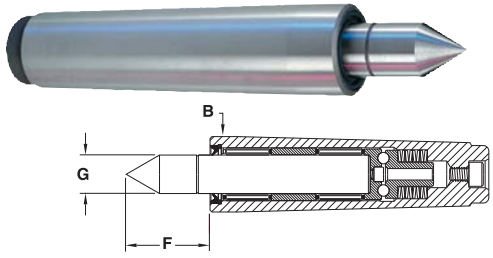
Spring Type Live Centers - Standard & CNC Point

- Unique spring-loaded point compensates for workpiece thermal expansion
- ±0.00005" TIR guaranteed
- Low-profile design provides outstanding tool clearance
- Heavy disc springs ensure that the point remains seated in the workpiece
- Point and shank are hardened for strength and durability





Point Style - CNC

RAPIDHOLD Super Precision Live Center Sets, Heavy Duty

- Triple bearing heavy duty design
- All centers are provided with the precision bearings
- One piece body made of high quality of forged alloy steel, hardened to 60HRC and precisely ground
- Every set comes with the main body and 7 different shape inserts and ejecting wedge
- Complete with strong metal or plastic case
- .0002" T.I.R.

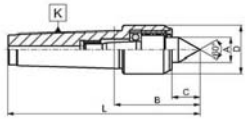
Slim Casing Live Centers

- For counter-clamping workpieces on turning and grinding machines
- Suited for cramped work area between center point and workpiece
- Enlarged work area and better workpiece accessibility thanks to narrow casing diameter
- Maximum rigidity at high speeds
- Maximum concentricity deviation of 0.0002" for maximum precision



New!

Precision Live Centers

New!

- Each center hardened and ground from one single piece of forging
- Spindles are made of high quality alloy steel, heat treated to RC 60-62
- Each live center provided with 3 selected heavy duty precision bearings
- Each bearing is specifically protected against dust and coolant

RAPIDHOLD Super Precision Live Centers, Heavy Duty

- Triple bearing heavy duty design
- All centers are provided with the precision bearings
- One piece body made of high quality of forged alloy steel, hardened to 60HRC and precisely ground
- Bearings are protected by a special steel ring
- .0002" T.I.R.

ROYAL PRODUCTS Value-Turn™ Live Centers

MADE IN THE USA

- A sturdy low-cost center designed for general medium-duty turning applications
- ±0.00005" T.I.R. guaranteed
- Precision three-bearing design enables the Royal Value-Turn® to achieve both high RPM's and solid load ratings
- Head is hardened for strength and durability

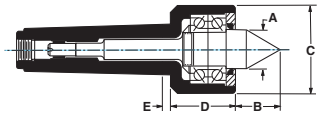
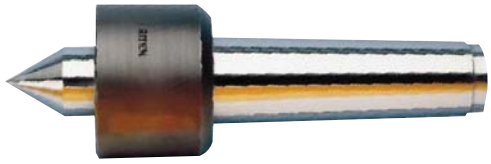
Riten Live Standard Point Centers





- Accuracy guaranteed to ±.00005 T.I.R.
- Heavy duty bearing design
- Points are through-hardened to 61-63 Rc.
- Full length spindle for extra rigidity
- Bodies are heat treated for additional strength
- Double row of angular contact bearings for superior performance
- Riten full service, repair, and guarantee apply

RAPIDHOLD™ Live Centers

101 Series:

- Machined from one piece of forging, hardened and precisely ground
- Three precision high-quality bearings are protected by a special Steel shield and neoprene seal
- Live centers are lubricated with a special grease and do not require any additional lubrication

102 Series:

- Machined from one piece of forging, hardened and precisely ground
- Three precision, high-quality bearings are protected by a special Steel shield and neoprene seal
- Adjustable, ultra precision radial bearing reduces run out to minimum after much use
- Easy to adjust

Style - 101 Series Ball/Roller Bearing

ROYAL PRODUCTS Heavy Duty Spindle Type Live Centers

- An excellent heavy-duty live center designed to handle most turning applications
- ±0.00005" T.I.R guaranteed
- Heavy-duty precision bearings provide exceptional thrust and radial load capacities
- The substantial point extends into the shank where it is supported by a large needle bearing for increased strength and rigidity
- Bearing life is significantly extended with the exclusive Royal Roto-Shield™ coolant slinger and upgraded, long-life, spring-loaded seal that is resistant to abrasion, high temperatures and virtually all metalworking fluids
- Body and point are hardened for strength and durability
- On the CNC model, the extended point provides great tool clearance

Perfetta™ Quattro Forte Heavy Duty Live Center

Finally, A Live Center With Taper Bearings!!!

The First Choice Technology

- Taper bearings are used in the design of lathe headstocks to support the spindle
- Heavy-duty bearing type to support radial and axial forces

Features:

- Precision Concentricity T.I.R. .00015
- Heavy-duty precision quad bearings
- Bearings permanently lubricated
- Chromium-Molybdenum Alloy Steel
- Surface heat treated to 62Rc and precision ground manual lathes

Bull Nose Live Centers

- Centers are designed to hold pipe and hollow work
- Triple bearing design
- Three matched bearings are preloaded at the factory
- Good thrust and radial capabilities
- Bearings are protected by a special seal
- Head is made of high quality alloy steel and heat treated to RC 61-63
- 60 degree head angle

ROYAL PRODUCTS High Precision Quad Bearing Live Centers

- Great for grinding and tight tolerance turning
- ±0.00005" T.I.R. guaranteed
- Three precision angular contact bearings are secured to the point with a locknut to form a rigid, preloaded assembly
- The point extends into the body where it is supported by a needle roller bearing, which further increases rigidity, reduces point deflection, and dampens vibration
- Bearing life is significantly extended with the exclusive Royal Roto-Shield™ coolant slinger and upgraded, long-life, spring-loaded seal that is resistant to abrasion, high temperatures and virtually all metalworking fluids
- Low profile head provides excellent tool clearance
- Body and point are hardened for strength and durability

ROYAL PRODUCTS Versa-Turn Live Centers

- A great multi-purpose live center designed to handle most common turning jobs
- Extended point provides good tool clearance
- Bull head is great for tubes and parts with large center holes
- ±0.00005" T.I.R. guaranteed on both sections of rotating point
- The Royal Versa-Turn is extremely free turning — excellent for thin parts that can't take high thrust loads
- Head and shank are hardened for strength and durability

Riten Multi-Use Live Centers

- Ideal for general machine shop use
- Can be used when machining thin-walled workpieces or general shaft work applications
- The versatility of this center makes it a "must have" tool when your center needs change frequently
- Accurate to ±.0001 T.I.R.
- Great for manual lathe applications
- Riten full service, repair, and guarantee apply

Riten Advantage Live Centers - Tracer & Long Points

- Accuracy guaranteed to ± .00005
- Heavy-duty Tri-bearing design
- Points are through-hardened to 61-63 Rc
- Three angular contact bearings for superior performance
- Full length spindle for extra rigidity
- Bodies are heat treated for additional strength
- Riten full service and repair apply

Front Mounting 3 & 4-Jaw Self-Centering Scroll Chucks

Bison Features:
- Two-piece hard reversible jaws
- Scroll and jaws are hardened and ground

BTC Features:
- American standard two-piece tongue and groove Jaws
- Scroll and jaws hardened and ground
- Top reversible jaws

Supplied With:
- Master jaws and top jaws
- T-wrench
- Mounting screws

Toolmex Features:
- Forged steel bodies for durability and rigidity
- Two-piece hard reversible American Standard Tongue and Groove jaws are made of high quality alloy steel then hardened and ground

3-Jaw Semi Steel Body Front Mounting Chucks

Features:
- Can be mounted directly on 3/6 slot rotary tables or on a base plate when the rotary table has 3/6 or 4/8 T-slots
- Base plates are designed for use with all rotary tables and other devices where back mounting chucks cannot be used
- Can also be mounted to a rough machined backplate, but will require machining of bolt hold patterns and projections for finished assembly

Supplied With:
- 2 Pc. Jaw Chucks: 1 set each Hard Master and Reversible Hard Top Jaws
- Solid Jaw Chucks: 1 set each solid ID and OD jaws
- 1 Chuck wrench
- 1 Set of mounting bolts
- Eye bolts for chuck sizes 16” and largert

TOOLMEX Industrial Solutions 3-Jaw Closed Center Direct Mount Power Chucks

- Supplied with spindle mounting plate, set of soft top jaws, set of t-nuts, wrenches for chuck installation and operation
- Low cost direct replacement for major OE brands
- High performance and great value
- Use existing top jaws 1.5mm x 60° serrations
- Hardened and ground critical surfaces for long life and high accuracy
- 1 Year Warranty

PRM Bench Milling & Drilling Machines

Used in many prototype shops, labs, maintenance shops . . . even home use.

- Versatile and multi-purpose machine can be used for drilling, milling and even tapping
- Has features of many larger mills, sturdy construction, headstock swings 360° and moves up and down on column to meet various job requirements, R8 taper spindle, bronze adjustable leadscrew nuts, large cast tables with T-slots, heavy duty tapered roller bearings to support the spindle, hinged belt cover allows speedy belt changes, satin finish easy to read dials, positive easy to read depth gauge
- RF25, RF311 & RF313 are step pulley heads
- RF40 is gear head
- RF313PFS equipped with powerfeed on the spindle
- 1 Year parts warranty

Standard Equipment:

- Manual reversing switch, tilting vise, shell end mill cutter, cutter arbor, 1/2" drill chuck, drill chuck arbor, service tools and instructions

Optional Accessories:

- Steel cabinet stand (shown below)
- Powerfeed for table (shown below)

Weight	Order No.	Price
15 lbs	**RL80RF30BPFT**	574.86

PALMGREN INC Geared Head Milling Machines

- Variable speed gear head milling machine delivers precision, power and versatility to handle a wide range of small workpiece metalworking applications
- The all gear drive transmission delivers full power at any speed
- Equipped with a high performance brushless DC motor permanent current control and infinitely variable speed
- Rigid box column with hardened and ground hand scraped dovetail ways
- All gear drive transmission with 2 step gear box
- The milling head can be tilted right or left up to 90 degrees
- Cross slide table is precision ground with t-slots, adjustable limit stops, scale and two metal adjusting hand wheels
- Interlocking spindle safety guard
- Draw bar
- Safety electrical system with emergency stop button and 24 volts at all the switches
- Two Stage Gearing Motor
- Swing Away Safety Shield with Micro Switch
- Depth stop
- 3 Year Warranty

PRM 9" x 49" Table Step Pulley Knee Type Milling Machine

- Step pulley machines are the answer for maintenance shops, job shops, repair shops, light production and school needs
- A quality mill that meets or exceeds the industries standards, that is within even the strictest of budgets
- 1 Year Warranty Parts

Standard Equipment:

- Draw bar
- One shot lubrication pump
- Rubber splash guard
- Tool box, tools and manual

Table Size (in.)	X-Axis (Table Travel) (in.)	Y-Axis (Saddle Travel) (in.)	Spindle Taper	Spindle Speeds	Motor	Weight	Order No.	Price

Bridgeport by HARDINGE 9" x 49" Table Variable Speed Vertical Milling Machine

- Series I Standard Mill is the original milling, drilling and boring machine
- Series I Knee Mill is the most popular mill ever made with over 370,000 machines built over the past 70-plus years

Features:

- One-shot lubrication system
- Chrome-plated ways and gibs
- Color machine tool gray
- Class 7 precision spindle & anti-friction bearings
- Built-in fine powered quill downfeed
- Rapid adjusting-fine position micrometer (educated nut)
- OSHA approved standard cutter guard
- 1 Year Warranty Parts

Table Size (in.)	X-Axis (Table Travel) (in.)	Y-Axis (Saddle Travel) (in.)	Z-Axis (Knee Travel) (in.)	Spindle Taper	Spindle Speeds (RPM)	Motor	Weight	Order No.	Price

PRM 9" x 50" Table Variable Speed Knee Type Milling Machine

Features:

- Meehanite casting
- Hard chromed ways (X & Y Axis)
- Spindle unit made from one piece alloy steel, supported by two precision angular contact and one ball bearing to ensure rigidity
- Spindle inner taper hardened and precision ground
- Dynamically balanced pulleys and precision bearings
- Spindle back gear running in grease packed housing to ensure fatigue strength and low noise
- Chrome coated and mirror ground finished quill
- Rigid head tilting system greatly increases the stability and rigidity when vertical head tilted at all angles, front and back. 6 T-bolts to lock knuckle to ram instead of 3
- Unique double nuts and backlash adjusting design, contact face enlarged ensuring accuracy over time and easy backlash adjustment.
- One shot lube
- Front and rear way covers
- Tool kit
- 1 Year Warranty Parts

PALMGREN INC 9.843 x 43.3" Horizontal Milling Machine

- Universal horizontal milling machine features a rigid knee and column construction and has the ability to do either horizontal or vertical milling
- Equipped with a power table feed, vertical spindle attachment and a wide range of spindle speeds
- Internally ribbed, box column
- Precision ground and t-slotted table
- Flame hardened to RC 50-54, precision ground and hand scraped ways
- One-shot lubrication system delivers metered oil to slideways and leadscrews
- Heavy duty 3 v-belt drive system delivers full power to the drive gear box and spindle
- The speed gear box is make up of hardened and ground gears running in an oil bath
- The table can be positioned by means of manual hand wheels or it is equipped with a gear driven power feed on the “X” axis / longitudinal travel
- Three speed settings plus rapid advance movement
- “Z” axis has motorized rapid elevating assist
- A vertical spindle head attachment can transform the horizontal machine to a vertical machine quickly
- The head can be disassembled and mounted in position easily via the machine mounted vertical head bracket
- Flood coolant system and chip tray

ACER 9" x 49" Table Electronic Variable Speed Vertical Milling Machines

Features:

- 3 HP Spindle Vector A/C Inverter Drive Motor
- Toshiba A/C Frequency Inverter Control
- Electro/mechanical Brake
- Precision Ball Bearing Spindle
- Chrome Plated & Precision Ground Spindle Quill
- Table surface and all ways on machine are hardened and ground to HRC-52 hardness
- Turcite B lining on saddle ways make X & Y movement smooth and easy
- Rigid Meehanite GA-50 Casting
- Protective automotive paint ensures life long appearance
- 1 Year Warranty Parts

Standard Equipment:

- Reversing Switch
- One-Shot Lubrication System
- Way Covers
- Overload Protection
- Service Tools
- Instruction and Parts Manual
- 220V Unit can operate on single phase power

10" x 50" Table Electronic Variable Speed Milling Machine

Features:

- Yaskawa compact AC inverter drive
- Inverter Duty, High Energy - High Efficiency Motors for lower utility costs, save up to 35%
- Centrally located controls for ease of operation
- Immediate response speed control (0-full speed in 4 sec.)
- Full range RPM selection.
- Electronic inverter controlled braking for reduced set-up time
- “Turcite-B” inserted guideways for extended machine life
- Complete electrics with low voltage controls for safer machine operation
- Fan cooled electrical enclosure
- Heavy “Meehanite” cast iron construction for excellent damping
- Huge hardened steel box ways on knee
- Built in coolant system
- One shot lubrication
- 1 Year Warranty on Parts & Labor, 6 Months on all Electrical

10" x 54" Table Boxway Electronic Variable Speed Milling Machines

Features:

- No variable speed belts means no slippage
- Vector type AC frequency inverter drive
- Square Boxways
- Electro/mechanical brake stops spindle immediately
- Table parallelism tolerance guaranteed within 0.0008″ every 20″
- Knee and ram movement guaranteed within 0.0008″ every 12″
- Class 7 precision spingle bearings - 3 pieces - run-out guaranteed to within 0.00015″
- Table surface and all ways on machine are hardened and ground to HRC-52 hardness
- Turcite B lining on saddle ways make X & Y movement smooth and easy
- Chrome plated X & Y leadscrews (HRC 60°) features a double nut backlash compensator
- True Meehanite casting
- Protective automotive paint
- Full one year warranty on all parts and service
- 220V Unit can operate on single phase power

Standard Equipment:

- Reversing Switch
- One-Shot Lubrication System
- Way Covers
- Overload Protection

12" x 60" Table Electronic Variable Speed Vertical Milling Machines

Features:
- Inverter Control Variable Speeds: Toshiba
- Precision Grinding Head Housing; Electric Brake
- Precision Spindle with ABEC-7 Bearing
- Chrome Plated & Precision Ground Spindle Quill
- Precision X, Y Axis & Knee by Hardened & Ground Square Ways to HRC 52
- Rigid Meehanite GA-50 Casting
- 220V Unit can operate on single phase power
- 1 Year Warranty Parts

Standard Equipment:
- Coolant System
- Halogen Light
- X & Y Axis with Power Feeds
- Motorized Knee for rapid up and down
- Automatic Lubrication System
- Tool Box with Tools
- Chip Pan
- Safety Handwheels with Handles
- Electric Cabinet and Ergonomic Control Panel

Bench Lathes

- Bench model engine lathes deliver the precision, power and versatility to handle a wide range of turning operations normally found in much larger machines
- Heavy cast construction, smooth power transmission with helical gears, hardened and ground ways all designed to give you years of trouble free, precise turning
- Built and inspected to DIN 8606 toolmakers precision lathe standard
- 1 Year Warranty Parts
- 7" x 12" Machine shown

Standard Equipment:

- 3 Jaw lathe chuck
- Safety chuck and tool post guards
- 4 Way tool post
- Centers
- Chip tray

KENT USA 20" Heavy Duty Large Spindle Bore Lathes

Features:
- Spindle Jog Button Control
- Solid full length casting base with front loading chip tray
- Adjustable Over-load feed clutches
- Quick reversal feed from apron
- Full length safety foot brake
- One shot lubrication for Apron, Carriage and Bed Ways
- Multi-position adjustable feed position stops
- Inch/Metric Heavy Duty Two Speed Tailstock
- Dual Inch/Metric Dials
- 1 Year Warranty

Standard Equipment:
- 10” 3-Jaw chuck
- Steady and follow rest
- Chuck cover
- Halogen worklight
- Thread chasing dial
- 4-Position tool post
- Coolant system
- Full-length splash guard
- 3-Position carriage stop
- Bed mount carriage stop

SUMMIT 20" Heavy Duty Large Spindle Lathes

Features:
- Removable gap
- Inch/metric threads
- Conveniently located controls
- Feed reversing at the apron
- 4-way rapid traverse
- Single lever control for feeds and rapids
- Full length splash guard
- 2 Speed tailstock
- 1 Year Warranty Parts & Labor, 6 Months on all Electrical

Standard Equipment:
- Thread dial
- Standard steady rest with roller tips
- Extra capacity steady rest with roller tips
- Follow rest
- Coolant system
- Taper attachment
- 3-Jaw chuck
- Carriage stop
- Work light

KENT USA High Precision Electronic Variable Speed Toolroom Lathe

Features:
- AC-Frequency Inverter Drive Main Spindle
- Inch and Metric Threading Capability
- Kick-Out Mechanism for setting position stops during threading operations
- Builty in 5C Collet Closer with 1-1/16" thru collet capacity
- Collet holders with swing-out mechanism in base cabinet
- Variable electric feeds for longitudinal and cross travels
- Quick engage/release mechanism slide compound
- 1 Year Warranty

Standard Equipment:
- 6" 3-Jaw chuck
- 4° Adapter Plate to fit 3 or 4 jaw chuck
- 5C Collet closer
- Collet holder in cabinet
- Coolant system
- Halogen work light
- Leveling bolts/pads
- One-shot lubrication
- Inch/Metric threading

KENT USA 14" x 40" EVS AC Frequency Drive Toolroom Lathe

Features:
- Frequency drive spindle motor capable of running on single phase power
- Digital Display
- Infinitely variable spindle speeds
- Hardened and ground gears and bedways
- Cast Iron machine bedways with full one piece cast base and front loading chip tray
- Foot brake
- Inch/Metric reading dials
- 1 Year Warranty Parts

Standard Equipment:
- 9" 3-Jaw chuck
- Chuck cover
- Steady rest
- Follow rest
- 4-Posititon tool post
- Coolant system
- Full-length spalsh guard
- Halogen worklight
- Carriage stop
- Thread chasing dial
- Micro Stop

ACER Electronic Variable Speed E Lathes With Constant Surface Speed & Newall DRO

- Constant Surface Speed - Provides an output that can be applied to an AC inverter spindle drive
- The system uses a DRO and the Precision Scale feedback to automatically control spindle RPM with the Highest Accuracy

Advantages of Constant Surface Speed:

- Optimum surface cutting speeds improving tool life
- Better surface finishes
- Includes a Digital Readout as Standard Equipment
- 1 Year Warranty Parts

PRM Drill Press Guards

- Give full protection from quill to drill point by the smooth telescopic action of the guards
- They collapse as the drill penetrates the workpiece, returning to extended position when spindle is raised
- Complies with BS EN 292 Safety of Machinery guard guidlines
- Clear vision for safe operation
- Rapid adjustment for drill length
- Fast access for cutting tool changes

PALMGREN Step Pulley Bench Model Drill Presses

- Features a heavy cast iron drill head, base and table
- The work table height is adjustable using rack and pinion
- Table can be tilted 45° to the right or left and rotates 360° around the column
- Precision ground slotted work table and base for secure, accurate mounting of fixturing and work pieces
- Other features include enclosed ball bearing quill assembly, quick belt tensioning mechanism and front mounted safety paddle switch
- 3 Year Warranty

PALMGREN Floor Model Step Pulley Drill Presses

- Constructed to provide a solid base for all your drilling operations, and offer a greater range of spindle speeds than any others in their class
- They have the weight and rigidity to maintain the built-in tight tolerances required for metalworking applications
- Fully enclosed spindle with spaced bearings for maximum spindle support and accurate drilling operations
- Maximum spindle run out of 0.0005”
- Extended quill/spindle travel ideal for deep hole applications
- LED readout for spindle speeds
- Quick change vertical depth stop for accurate, repeatable feed length
- Includes chuck with key and arbor
- Rack and pinion table raiser
- Table tilts 45 degrees right and left and rotates 360 degrees around the column
- Front mounted industrial paddle type power switch
- 3 Year Warranty

PRM 20" Variable Speed Drill Presses

Features:

- Offers built-in features found only in other higher priced machines
- Has rugged, heavy-duty cast iron construction with ground steel column
- Features variable speed two-speed motor to give an optimum of various spindle speeds
- Foward & reverse switch installed for tapping
- Wired 220V 3PH ONLY
- Model 20VSDTPF has mechanical power feed on the spindle with 4 feed rates of .004", .006", .009" & .012" IPR
- 1 Year parts warranty

Clausing 20" Variable Speed Drill Presses

Features:

- Superior performance for metalworking – Production rated 1-1/4" in cast iron, 7/8" in steel
- Infinitely variable speed countershaft drive
- All drill presses have a #3 Morse Taper spindle and 6-1/2" spindle travel
- Heavy-duty precision head...all bearing surfaces are precision bored simultaneously for exact alignment
- Eight ball bearings support drive and spindle
- Precision ground oil through tables...handle big workpieces easer
- 22" x 19" Table
- Shipping weight: 630 lbs.
- Proudly Made in the USA
- 1 Year Warranty

PALMGREN Variable Speed Floor Drill Presses

- With the Palmgren 20" variable speed drill press you can dial the best rpm for the tool and material while the job is running
- Simple hand wheel adjustment sets the speeds and immediate rpm reading appears on the front face of the machine
- The heavy duty cast iron construction forms a solid base for all your drilling operations with an oversized precision machined drill head, extended quill travel and a 4-1/2" column the Palmgren 20" variable speed drill
- Full bearing support with radial thrust and ball bearings
- LED Spindle speed readout
- Front mounted positive control depth stop
- Large precision ground t-slotted table with coolant trough
- Front or side operated rack and pinion table raiser
- Table rotates 360 degrees around the column
- 3 Year Warranty

DAKE Electronic Variable Speed Drill Presses

- Locking handle hub with convenient dial-in adjustment and an easy to read scale
- Large diameter sturdy spindle for rigid drilling has four bearing points for smooth operation
- Machined table and base surfaces with t-slots for mounting and fixturing
- Forward and reverse selector switch for tapping applications
- Model SB-250V automatically advances to preset depth, bottoms out, and returns automatically (Spindle Power Downfeed)
- CE safety electrical package features push button on/off switch, emergency stop button, low voltage controls, thermal overload, and interlock safety switch for belt cover
- Latest frequency inverter technology for easy speed changes and concentrated torque

Ellis Electronic Variable Speed Drilling & Tapping Machine

Features:

- 2 HP motor with A.C. inverter
- Electronic Infinitely Variable Speed
- Machine can tap 3/4” holes (N.C.)
- High torque at all speeds even in forward or reverse
- Continuous speed while in operation
- Instantaneous reversing for tapping
- Can tap right or left hand threads
- Variable speed from 0-1200 RPM
- Ball bearing chuck, drill bit and machine vise shown on machines are optional
- Three Machines in One – Tapping Machine, Drilling Machine, Reaming Machine
- Machines comes standard with power downfeed on spindle
- 1 Year Warranty

15" Arm Mini Radial Drilling Machine

- Step pulley belt change head has 10 speed changes for smaller/larger jobs
- Can handle many functions where a standard drill press just isn't large enough
- Forward and reversing is standard
- Machine is equipped with a two speed motor, 3/4 and 1-1/2 HP and is wired for 230 voltage, 3 phase only
- 1 Year parts warranty

Radial Drilling Machines

Features:

- High speed nickel chrome steel gears mounted on splined steel shafts turning in anti-friction bearings
- Columns are designed for maximum rigidity and minimum deflection while machining
- Arm is ribbed to avoid stress from twisting
- Carbon steel spindle is spline driven and loaded with large diameter taper roller bearings for maximum accuracy
- Coolant tank is incorporated into the base casting
- 1 Year Warranty Parts

Standard Equipment:

- 4MT spindle taper, heavy duty non-tilting large box table, coolant system built into base, work light, 3-phase heavy duty motor and electric controls with overload protection

ROLL-IN SAW Vertical Metal Cutting Bandsaw

Features:

- For contour & profile cuts as well as rip cuts and angle cuts
- Gravity feed system - Power Feed Table permits 11” cuts as standard equipment
- Variable speed controls
- Safety powerfeed foot pedal
- Hydraulic Feed Regulator (assures chatter free cuts)
- 1 Year Warranty

PRM Vertical Bandsaws

Features:

- Light to heavy duty vertical bandsaws for most applications
- Variable speed
- V-Type saw guides & inserts
- Blade welder with integrated annealing unit
- Blade shear & grinder
- Chip blower & jet
- Low voltage worklight
- 15° Four-way tilt table
- Low voltage controls
- One blade & blade guard
- Tool box
- Complete instruction & parts manual
- KB45 and KV50 have blade speed tachometer and blade tension indicator
- Completely guarded
- Magnetic controls with low voltage transformer
- 1 Year Warranty Parts

DAKE Vertical Bandsaws

Features:

- Digital tachometer
- Blade speed / pitch selector guide
- Work Light
- Bi-Metal Blade
- Blade tension indicator
- Blade welder / grinder / shear
- Variable Speeds with 82 – 3,950 feet per minute speed range
- Chip blower
- Blade brush
- Heavy cast table with chip clearance grooves
- Rip Fence
- Four-way tilt table
- Low voltage controls, main power lock out switch and door limit switches
- Heavy-duty quiet running two speed gear box

COSEN Vertical Contour Bandsaws

Model VCS-1000 Features:

- Cast aluminum work table
- Crowned and rubber capped wheels
- Inverter-controlled blade speed
- Fully adjustable tungsten carbide blade guides
- Blade tensioning wheel built-in
- Work light
- Rip fence
- Main table tilts 15° L/R
- +/- 10° fore/aft table tile
- Secondary table - stationary
- Chip blower
- 2 Year Warranty Parts, 1 Year Warranty Labor

Model VCS-600 Features:

- Fully adjustable tungsten carbide blade guides (included) covers all blade sizes
- Cast aluminum work table
- Rubber capped wheels
- Inverter-controlled blade speed
- Work light
- Post elevating hand wheel
- Rip fense
- Table tilts 15° L/R
- +/- 10° fore/aft table tilt
- Chip blower
- Blade tensioning wheel built-in

Model VCS-600H Features:

- Cast aluminum work table
- Cast wheels are rubber capped
- Inverter-controlled blade speed
- Fully adjustable tungsten carbide blade guides
- Blade tensioning wheel built-in
- Band break switch
- Work light
- Post elevating hand wheel
- Rip fence
- Table tilts 15° L/R
- Two tee slots in tabletop
- Hydraulic table feed rate control
- Band mist lubricator

Wellsaw 20" Vertical Metal Cutting Bandsaw

Features:

- Extra wide range of the dial in variable speed system allows cutting of various materials (wood, plastic, aluminium, composite, ferrous & non-ferrous metals)
- Special blade guides rotate 90° to allow sawing from the side of the machine -can make cuts of unlimited length
- Specify Voltage - Available in single or three phase
- Blade Guides- six sealed roller bearings
- Available with 24" under the guide
- Available with blade guides for 1" blade
- 2 Year Warranty

MADE IN THE USA

Standard Equipment:

- Flexible Machine Arm Light
- Magnetic Starter with 115 Volt Circuit
- Blade Tension Indicator
- Two-Speed Transmission
- Blade Speed Indicator
- Heavy-Duty Roller Guides
- 1/2" General Purpose Blade
- Chip Blower

PALMGREN 6" Mitre Bandsaw

Features:

- A bench top band saw comes with large cutting capacities
- Easy to move and position where needed
- The miter head swivels and locks for fast, easy miter cutting
- Heavy duty base with integrated vise
- Ergonomic hand grip and switch
- Electronic variable speed direct drive motor
- Adjustable tension feed control
- Work stop
- Push button power on/off switch
- 3 Year Warranty

COSEN Mitering Horizontal Bandsaws

Model MH-270M Features:

- Built-in integral coolant system
- Blade cleaning chip brush
- Stepless variable blade speed
- Adjustable material stopper
- 60° swivel frame design
- Hardened worm gear
- Carbide insert and bearing to enhance blade support
- Hydraulic feed control with on/off valve
- Heavy duty quick clamp/release vise
- AutoCut mode with large feed rate control valve
- Quick Approach mode with release trigger

Model MH-300DM Features:

- Hydraulic cylinder plus precision ground hinge support
- Swivel frame design
- Built-in integral coolant system
- Direct drive gearbox
- 1.6 HP motor
- Carbide blade guides with roller bearings
- Two additional guides enhance blade support
- Cast-iron rigid guide arms
- Blade tensioning system fitted with indicator gauge
- Blade brush to remove chips
- Heavy duty quick clamp/release vise
- Adjustable down feed rate control with on/off valve

Model MH-350DM Features:

- Hydraulic cylinder plus precision ground hinge support
- Swivel frame design
- Large rugged base
- 1.5 HP motor
- Direct drive type gearbox
- Carbide blade guides with roller bearings
- Two additional guides
- Rigid guide arms
- Blade tensioning system fitted with indicator gage
- Integral coolant system
- Blade brush to remove chips from blade gullet
- Down feed rate control with on/off valve
- Quick clamping/releasing vise
- 2 Year Warranty Parts, 1 Year Warranty Labor

Wellsaw 6" x 13" Horizontal Bandsaw

Features:

- Hydraulic Feed Control with Adjustable Counterbalance Spring
- Ball Bearing Blade Guides
- Perimeter Ring Gear Blade Drive
- Rite-Tension® Band Tensioning Device
- Wet Cutting System
- Overload and under voltage Protection
- Quick Acting Vise, Adjustable Stock Stop
- Auto Shut-Off at End of Cut
- OSHA Blade Guarding
- 1 Year Warranty

PRM 7" x 12" Horizontal-Vertical Medium Duty Non-Production Portable Bandsaw

Features:

- Hydraulic cylinder for adjustment of head pressure
- Horizontal and vertical cutting
- Four blade speeds
- Vise can miter 45° and 90°
- Blade tensioning adjustment, adjustable ball bearing blade guides
- Guarded automatic shut-off switch
- 1 Year Warranty Parts

Standard Equipment:

- One 3/4" saw blade, casters, coolant system, vertical table, adjustable stock stop, blade brush, heavy duty 1 HP motor, instructions & parts manual
- Complete & ready to run

DAKE 7" x 12" Intermediate Duty Horizonal Bandsaw

Features:

- Quick release valve
- Hydraulic controlled, gravity head feed with combination head speed flow control/ head lock valve
- Horizontally mounted guide arms for more rigidity and straightest cuts
- Cast one piece head frame
- Cast lip and grooved designed wheels
- Low voltage controls with thermo overload protection
- V-Belt and step pulleys for fast speed changes
- Mechanical blade tensioning
- Converts for vertical use
- Self contained coolant system
- 1 Year Warranty

KALAMAZOO Wet Cutting Horizontal Bandsaw

Features:
- 4 Speed step step pulley with worm gear speed reducer, worm shaft is hardened and ground
- Totally enclosed transmission
- Heavy-duty hydraulic cylinder with precision ground hinge support
- Pan shaped base with built-in coolant & hydraulic system
- Cast iron bed
- Carbide blade guides with roller bearings
- Two additional bearings to support blade from the top
- Recirculating coolant system with application through both guides
- Valve controlled hydraulic cylinder controls feed and cutting rate and can be adjusted for different types and sizes of material
- Adjustable stock stop
- Simplified control switches mounted on saw head
- Cast iron quick acting 0-45° vise with manual leadscrew clamping system
- Tool box, leveling pads, and an additional wire brush
- 2 Year Limited Warranty

COSEN Manual Pivot Bandsaw

Model MH-1016JA Features:

New!

- Presicision ground hinge guides the saw frame through out cutting cycle
- Quick set up vise enables miter cutting at desired angles
- Hydraulic shuttle vise assembly
- Built-in coolant & hydraulic systems
- Carbide blade guides reduce wear on blade guides and blade
- Rigid guide arms on a dovetail slide greatly reduces vibration, achieving a better cutting result
- Integral coolant system
- Down feed rate control
- Cast iron vises
- 2 Year Warranty Parts, 1 Year Warranty Labor

Manual Swivel Head Mitering Horizontal Bandsaw

Model MH-460M Features:

- Heavy duty hydraulic cylinder plus precsion ground hinge support and guide
- Specially designed heavy-duty cast iron swivel center features straight and miter cuts from 90 to 30 degrees
- Large rugged base with build-in coolant & hydraulic systems
- 2 HP motor, heavy-duty reducer, and variable step drive assembly
- 4-speed transmission is equipped with the best worm gear speed reducer
- Carbide blade guides with roller bearings
- The rigid guide arms are mounted on an extra wide precision ground dovetail slide
- Two additional guides located on a central axis
- Integral coolant system
- Blade brush to remove ships from blade gullet
- Down feed rate & cutting pressure control
- Cast iron vises with replaceable extension plate
- Secure clamping via a dependable manual lead screw system with anti-slip hand wheel
- 2 Year Warranty Parts, 1 Year Warranty Labor

marvel 13" x 18" Dual Mitering Horizontal Bandsaw

Features:

- Unique sliding vise design that repositions vise for mitering
- Quick adjusting vise jaw
- Hydraulic down feed with auto head lift
- Heavy duty steel plate base
- Swing Arm control console
- Carbide blade guides with roller bearings
- Powered chip brush
- 1/8 HP coolant pump with flushing hose
- Blade speeds 90, 140, 220, 320 SFPM
- 2 Year Warranty Parts & Labor

ROLL-IN SAW 14" x 18" Miter-Cutting Horizontal Bandsaw

Features:

- Horizontal saw head pivots 45° right and 45° left
- Quick acting vise can be mounted on either side to accommodate material to be cut
- Variable hydraulic cylinder to control saw head feedrate
- Table workload capacity of 3500 lbs.
- Automatic shutoff at the end of cut
- Adjustable cast iron guide arms
- Easily accessible control box
- Outstanding quality since 1940
- 1 Year Limited Warranty

Standard Equipment:

- Carbide guide inserts, 4 roller infeed material loading conveyor, 4 roller outfeed material unloading conveyor, 8 Gallon capacity flood coolant system, blade cleaning brush and safety magnetic starter

Semi-Automatic Swivel Head Mitering Horizontal Bandsaw

Model SH-460M Features:

- Precision ground hinge guide saw frame through cutting cycle
- Heavy-duty cast iron swivel center features straight and miter cuts from 90 to 30 degrees
- Built-in coolant & hydraulic systems
- Carbide blade guides
- Rigid guide arms on an dovetail slide reduces vibration, achieving a better cutting result
- Downfeed rate & cutting pressure control
- Cast iron vises
- 2 Year Warranty Parts, 1 Year Warranty Labor

Semi-Automatic Horizontal Pivot Bandsaw

Model SH-250R Features:

- Smooth and consistent downfeed accomplished via universal ball joint support
- Gearbox designed to accept high lateral pressure (no thermal distortion)
- Infinitely variable blade speed
- Carbide blade guides
- Rigid guide arms on an dovetail slide allows easy adjustment of guide arms
- Integral coolant system
- Downfeed rate & cutting pressure control
- Front and rear hardened wear strips
- 2 Year Warranty Parts, 1 Year Warranty Labor

Semi-Automatic Mitering Horizontal Pivot Bandsaw

Model SH-500M Features:

- Swivel sawhead allows cutting at any angle between 0° (straight cut) and 60° (miter cut)
- Hard stops at 0°, 45°, and 60° for quick angle set up
- Integral coolant system
- Blade drive equipped with variable pully drive
- Infinitely variable blade speed system - 3 HP drive
- Carbide guides
- Synchronized blade brush
- Work height selector
- Built-in adjustable material stop
- Full stroke machine vise
- Optional Micro Droplet Applicator replaces traditional flood coolant system
- 2 Year Warranty Parts, 1 Year Warranty Labor

Wellsaw® 1316S-SA Semi-Automatic Bandsaw

Features:

- Provides the strength and precision of our popular swivel head saw with the convenience of true semiautomatic operation
- The factory programed PLC manages the saw head and bed vise improving both safety and productivity
- True swivel head
- Cuts from 0° to 60°
- Hydraulic feed control
- Flood coolant system, worklight and 5 ft. infeed conveyor are all standard
- Variable Bandspeed
- Full cycle, automatic control of the saw frame and vise jaw
- Full function control panel for manual control of all functions
- Positive feed control for increased performance on oversized pieces
- Available in single phase
- 5 Ft. infeed conveyor not shown
- 2 Year Warranty

Wellsaw® 1318-SA Semi-Automatic Bandsaw

- PLC Controlled, full cycle semi-automatic operation
- Variable hydraulic feed rate control
- Spring loaded carbide guides with rollers
- Combination reduction gearbox and perimeter ring gear blade drive
- Infinitely variable blade speeds
- Rite-Tension® blade tensioning device
- Wet cuttying system
- 110 Volts at controls
- Overload and undervoltage protection
- Quick acting vise/air powered
- Adjustable stock stop
- Auto shut-off at end of cut
- OSHA blade guarding
- Shown with optional infeed conveyor
- 2 Year Warranty

Horizontal SNC Automatic Saw with Shuttle Vise

Features:

- Smart NC-100 (SNC100) technology provides most of the benefits with NC controlled saws
- SNC100 controls are programmable up to 100 different jobs including quantity and length of cut
- The control automatically compensates for Kerf loss after data input and requires no manual calculation of number of times to index

High-Speed, Heavy Duty, Fully-Automatic Horizontal Production Bandsaws

Features:

- Automatic hydraulic shuttle barfeed
- Hydraulic blade tensioning
- Infinitely variable saw blade speeds through an A/C inverter drive & worm gear transmission with an electric tachometer
- Digital cut length settings and piece counter, on PA10/3
- 0 to 300 lbs. positive hydraulic infinitely variable feed force pressure
- Motion detector which shuts down in the event of a blade failure
- Out of stock switch and work light
- Combination roller bearing and carbide blade guides chip auger
- Fully stroking hydraulic split vise jaws ideal for bundle cutting
- EPC control has touch pad length input for 9 jobs
- 5 Gallons of coolant
- Specify 230 or 460 voltage - Other voltages are optional
- 2 Year Warranty Parts & Labor

Mark II Bandsaws

Features:

- Miters 45° left or right
- Does not have a power tilt
- Quick-action vise
- Maximum opening: 18”
- Feed range: 0-140 lbs.
- Automatic stops
- Work light
- Coolant system: 21 gallon capacity
- Cast iron table & cartridge
- Flushing hose & power chip brush
- Carbide guide system
- Blade tension indicator
- Electrical equipment conforms to NFPA-79
- Welded edge saw blade
- 5 Gallons of coolant
- 2 Year Parts & Labor Warranty

Mark III Electronic Variable Speed Bandsaws

Features:

- EVS 5HP vector drive
- A/C inverter motor
- Miters 60° left & right
- Quick-action vise: maximum opening 18”
- Automatic stops
- Work light
- Coolant system: 21 gallon capacity
- Cast iron table & cartridge
- Flushing hose & power chip brush
- Carbide guide system
- Blade tension indicator
- Electrical equipment conforms to NFPA-79
- Welded edge saw blade
- 5 Gallons of coolant
- Saw blade: 1-1/4” wide
- Feed range: 0 to 250 lbs.
- Automatic column return and the column can be adjusted to either straight or 3° forward canted approach angle for increased cutting efficiency of structural materials
- Models 81112, 81112PT & 81114PT include power tilt head
- 2 Year Parts & Labor Warranty

9" x 18" Semi-Automatic Double Column type Horizontal Cut-Off Bandsaws

Standard Equipment:

- Double column type Semi-Automatic up & down
- Carbide guides with back-up
- Ball bearings
- Full coolant system
- Fully hydraulic controlled saw head up and down rate decent
- Uniform feed rate and cutting pressure
- Quick and easy blade change
- Manually controlled blade tension
- Conforms to NFPA-79 electrics standards
- Also available in single phase
- 1 Year Warranty

PALMGREN Cold Saws

- Ideal for very precise, burr free cuts in low and high carbon steels and medium gauge tubes and profiles
- The pivot head design allows for fast, accurate miter cuts
- Advanced gear box design utilizing hardened and ground gears with a high quality bronze worm gear running in an oil bath
- Built in coolant system lubricates the blade for smooth mill cut finish
- A centrally tensioning anti-burr vises securely clamps the work piece on both sides of the blade with equal clamping force and holds the work piece in-between 4 jaw faces
- The adjustment of the saw head for miter cutting is fast and easy with the saw head pivoting both to the right and left of center
- The 9683130 bench model can use either a 9"/225mm or 10" /250mm blade
- The 9683131 is a floor model with a compact heavy duty steel base with lockable door and shelf
- It is equipped with a built-in clutch to protect the gear box and blade from breakage
- 3 Year Warranty

Scotchman Metal Fabricating Solutions — Slow Speed Cold Saws for Cutting Ferrous Materials

Features:
- **11" Model Features:** Two cutting speeds (30 & 60 S.F.P.M.) and (1) 10-3/4" HSS blade
- **14" Model Features:** Two cutting speeds (22 & 44 S.F.P.M.) and (1) 12-1/2" HSS blade
- High speed for non-ferrous material
- Single Phase, Single Speed Saws are also available in all models - Call for Details
- PK Model denotes Air Operated Clamp for material vise
- 3 Year Warranty

Standard Equipment:
- Double self-centering vise with miter capabilities - 45° left and 45° to the right, (7) gallon coolant system, (1) gallon coolant, with chip drawer and Hand operated trigger switch

KALAMAZOO Industries Inc. — 14" High Speed Non-Ferrous Shop Saw (Aluminum & Brass)
14" Dry Steel Cutting, Mild Steel (1/4" wall thickness only)

Features:
- Non-ferrous saw for cutting aluminum, brass, plastic KM14HS
- 14" Dry Cut Mitre Saw for Steel KM14SC
- Miters 45° left or right
- Uses Carbide tipped steel blade - **not included**
- 1" Spindle
- Twin v-belt drive
- Dual Cam-lock vise
- OSHA safety blade guard
- Cast Iron construction
- 1 Year Warranty

MADE IN THE USA

KALAMAZOO Industries Inc. Miter Abrasive Cut-Off Saws

Model KM10 10” Miter Saw Features:
- Bench Model Only
- 5/8” Arbor Hole
- Angles from 0° to 45°– Either way
- Positive index holes–Up and down stops
- Two Cam-Lock vises–Lever- lock for table
- Does not include 10” Abrasive Wheel
- Model 12M Stand fits KM10 Saw
- 1 Year Warranty

Model KM16-18 16” – 18” Miter Saw Features:
- 1” Arbor Hole
- Miters either direction 45°
- Two cam vises
- Low voltage manual starter. DRY MODEL ONLY.
- Does not include 16” or 18” Abrasive Wheel
- 1 Year Warranty

Model KM14 14” Miter Saw Features:
- 1” Arbor Hole
- Angles 0° to 45° – either way
- Front lever lock
- Heavy-duty stand
- Specify voltage
- Standard Abrasive Blade Cut-off Saw
- Does not include 14” Abrasive Wheel
- 1 Year Warranty

MADE IN THE USA

Model KM 20-22 20” – 22” Miter Saw Features:
- Angles 0° – 45° both ways
- 1” Arbor Hole
- Rugged Steel Base
- Air operated chain vise
- Does not include 20” or 22” Abrasive Wheel
- 1 Year Warranty

TENNSMITH Universal Box & Pan Hand Brakes

- Brakes are a welded steel plate construction utilizing heavy side frames and truss bars, high tensile strength steel hinge pins, bronze oilite bearings and grease fittings
- All 16 gauge and up brakes feature a removeable apron insert permitting 1/4-inch reverse bends in lighter materials
- Upperleaf and nose bar have a wide range of adjustment for different material thickness of radii.
- Standard equipment includes an apron stop for repeat bends, ductile steel clamp handles and counterweights
- The 22 gauge brakes are a lighter version brake better suited for contractors and remote job sites
- Universal brakes have removeable case hardened fingers for box and pan bending
- Model PK50HBU4816S includes stand
- All 48" Brakes Listed are Bench Top Models
- Optional Steel Stand (Order Number PK5048S)
- 3 Year Warranty

NATIONAL Universal Box & Pan Brakes

Features:

- Precise bed and beam alignment
- Cast iron counterweights
- Stop rods for repeat bends
- Precision bearings on apron
- Heavy duty truss rods and brakes
- Streamlined design
- Suitable for many types of metal forming operations
- All body sections are steel welded
- Model U4816 is a Bench Model - Optional Stand is available
- 3 Year Warranty

TENNSMITH 16 Gauge Manual Foot Squaring Shear

Features:

- Heavy cast iron frame
- Surface ground bed
- Positive pedal stop
- Specially ground alloy blades
- Adjustable hold down tension
- Line of cut visibility
- Double locking back gage with embossed scales and knurled wheels for fine adjustment
- Front extension arms with stop
- Bevel gage
- Graduated side scales
- 3 Year Warranty

NATIONAL 52" 16 Gauge Metal Shear

Features:

- Designed for precise shearing through 16 gauge mild steel
- Recommended for shearing aluminum, plastic, copper, brass and lead.
- All cast iron body with four cutting edge high carbon, high chromium blades
- Back gauges
- Table gauges
- Spring actuated hold down
- Front arm extentions
- Bottom treadle safety stop
- 3 Year Warranty

TENNSMITH 16 Gauge Air & Hydraulic Sheet Metal Shears

MADE IN THE USA

52H Hydraulic Standard Equipment:

- Heavy cast iron frame, surface ground bed, industrial quality tie rod type hydraulic cylinders, heavy duty 3 HP motor, 10 gallon tank with sight gauge and thermometer, variable volume, pressure compensated vane pump, pressure gauge, low voltage shrouded foot switch, neoprene padded holddown feet, stroke counter, double locking back gauge with embossed scales and knurled wheels for fine adjustment, front extension arms with stop, bevel gauge, graduated side scales

36A and 52A Air Standard Equipment:

- Heavy cast iron frame, surface ground bed, industrial quality tie rod type pneumatic cylinders, foot operated air valve control, pressure regulator with gauge, oiler/condenser cups, neoprene padded holddown feet, stroke counter, double locking back gauge with embossed scales and knurled wheels for fine adjustment, front extension arms with stop, bevel gauge, graduated side scales
- 3 Year Warranty

NATIONAL 48" Power Slip Roll

- 3” Power roll is designed for simple operation
- Standard with forward and reverse drum switch
- Quick release upper roll
- Positive chain drive
- Heavy duty gear box
- Front guard for additional safety
- Heavy duty stand is standard
- Extra heavy duty end frames with quick release handle on the right front for speedy production forming
- Drive train is powered with a heavy duty precision reduction gear box to assure durability and long life
- The electric panel and gear box are housed in a ventilated stand for protection
- 3 Year Warranty

TENNSMITH 48" Power Slip Roll

- The SR48P powered slip roll has the productivety advantage of electric powered drive for production forming of curved parts and tubes made of 16-gauge and lighter sheet metal
- Drive power is supplied by a heavy duty, industrial quality gear reduction motor and roller chain directly to gear train
- Roll drive is controlled by a toggle action, shrouded foot pedal for instant forward and reverse action
- Drive motor is equipped with an electromagnetic brake to prevent roll creep and over formimg
- 3 Year Warranty

60 & 65 Ton Ironworkers

New!

Features:

- 60 Ton - Four Workstations: (4) Standard - Punch, Flat Bar Shear, Angle Shear & Coper Notcher
- 60 Ton - 9 additional attachments available
- 65 Ton - Five Workstations: (4) Standard - Punch, Flat Bar Shear & Angle Shear; (1) Open - Customize your ironworker with 10 optional attachments
- 65 Ton - 10 interchangeable attachments available
- Available with PowerLink™ System (AC500 & AC700 Models)
- ANSI B11.5-1988(O2) Compliant Guarding
- ETL/UI Approved Controls
- Integrated E-Stop, Lock-out/Tag-out
- Optimized workstation heights for improved efficiency
- Electric foot pedals with integrated jog control
- Adjustable stroke control
- 1 Year Warranty

PALMGREN INC 6" x 12" Manual Bench Surface Grinder

Features:
- Meehanite cast iron construction
- Precision steel balls produce extremely smooth operation of table along the ways
- Hand scraped ways
- Spindle and motor are a direct drive design and are dynamically balanced minimum vibration
- Swarf guard
- Large easy to read dials
- Spiral bevel gear for easy vertical movement of the spindle head
- JB559670109 Steel Floor Stand (Not Included)
- 3 Year Warranty

PRM 6" x 18" Surface Grinder

Features:
- Fuselage base with new box design and reinforcing rib, reinforced the rigid structure of the machine, to improve the stability of the machine
- Scientific design vacuuming, cleaning the mouth angle of inclination of 45 degrees, and can be adjusted up or down to ensure optimum suction power
- Imported P4 high precision spindle
- Imported high precision bearing
- Direct casting dust, dust-tight design is easily deformable plasticdust and other can not match. Dust is directly related to the merits of precision machine tools and machine

KENT USA 6" x 18" Hand Feed Surface Grinder

Features:
- Elevated H-Frame column design
- 21" spindle to table clearance under the wheel
- High precision flange-mount cartridge type spindle
- High accuracy ABEC-7 spindle bearings
- Cable driven table with roller balls on hardened steel way
- Centralized one-shot lubrication
- 1 Year Warranty

Standard Equipment:
- One 8" x 1" x 1-1/4" Grinding wheel
- 6" x 18" Permanent magnetic chuck
- Flood coolant system
- Diamond-tipped table dresser
- Wheel flange adapter
- Leveling bolts and pads

CHEVALIER 6" x 18" Precision Handfeed Surface Grinder

Features:
- 2HP low vibration spindle motor
- Spindle run-out within 0.00006”
- High precision cartridge-type spindle equipped with 4 pieces of class 7 angular contact ball bearings
- Hardened & ground table guideways with steel balls
- Patented, continuous loop, steel core reinforced and cog timing belt system
- Flatness is guaranteed to be within 0.0001” for the entire working surface
- Saddle travels on hand scraped double V guideways, laminated with Turcite-B
- Table handwheel can be indexed for ease of operation
- Automatic continuous lube system with oil flow indicator on column
- Meehanite casting
- 1 Year Warranty

Clausing 8" x 18" Manual Surface Grinder

Features:
- High precision cartridge spindle
- Anti-wear guide ways coated with “TURCITE-B”
- Enlarged column and base create high stability & rigidity
- Automatic lube system to lubricate lead-screws and guideways for greater longevity
- Timing belt table drive which has enclosed high tensile steel cores that ensure more smooth table movement and longevity
- Base tool cabinet for storage of tools, fixtures and manuals
- Heavy-Duty cast iron construction
- 2 Year Limited Warranty

PALMGREN INC Bench Grinders

- Palmgren's bench grinders are designed and built with high-quality motors for heavy duty use and long duty cycles
- Our stated horsepower is actual sustained horsepower under 100% loads with less than 1% loss from stated RPMs at same 100% loads
- Designed to do more, a Palmgren bench grinder provides you with 4 to 7 times longer duty cycles under load and 8 times less speed degradation than any other competitor
- Palmgren's line up of industrial grade bench grinders provide smooth, quiet power for all grinding, cleaning, deburring, chamfering and sharpening jobs
- Designed to handle heavy stock removal to finishing applications these powerful units are built for continuous, efficient use all day, every day
- Extended wheel-to-wheel clearance which allows longer items to be ground easily
- Dynamically balanced rotors and sealed bearings minimize vibration and ensure smooth running
- Large adjustable tool rests for safe, efficient tilt and angle grinding
- Adjustable safety eye shields and spark guards easily positioned with hurricane bolt
- Maximum performance, accuracy and value 9682061 comes with wheel guards with no dust collection ports
- Units fit Item # 9670101 or Item # 9686000 tool stands
- 3 Year Warranty

PALMGREN INC Heavy Duty Variable Speed Bench Grinders

New!

- Deluxe variable speed bench grinders deliver the power, precision and versatility
- At maximum rpm's they are built for heavy material removal, deburring and chamfering applications
- At the lower rpm range they effectively handle the more delicate cleaning, polishing, sharpening and other finishing operations
- Equipped with the latest technology variable speed inverter
- Powerful, heavy-duty capacitor motors
- LED speed readout with "soft" touch on/off and variable speed control pad
- 3 hard speed switch settings 900 / 1800 / 3600 RPM for the 6" & 8" models and 900 / 1800 / 2400 RPM for the 10" model
- Press the high or low switch button on touch pad to variably adjust the speed up or down in 100 RPM increments
- Dynamically balanced rotors and sealed bearings
- Extended wheel to wheel clearance
- Large adjustable tool rests
- Adjustable safety eye shields and spark guards
- Exclusive single port dust collection
- Units fit Item # 9670101 or Item # 9686000 tool stands
- 3 Year Warranty

BALDOR Industrial Buffers

Features:

- Buffers are designed for use with soft cloth wheels ONLY - Specific burring applications may require the addition of operator safety devices - Consult with a safety engineer before installation
- Model No. 111, 114 332B and 333B come with a power cord, plug & Switch - Factory wired for 115 voltage
- Models 334B, 330B, 409B and 412B are supplied with Start/Stop switch, wired for 208-230 voltage
- Models 407B and 410B come with a Switch but less cord & plug - Factory wired for 115 volt
- Models 1250, 1251, 1252 and 1253 are supplied with a Manual Starter -Specify voltage
- Models 1453, 1454, 1457 and 1458 are supplied with a Magnetic Starter - Specify voltage
- Flanges and nuts included
- Wheels not included
- Pedestals sold separately
- 3 Year Warranty Against Motor Burnout
- PP50-1458 is shown but does not include Pedestal (PP50GA20)

WS3000 Wood Tool Sharpener

- Work Sharp is an air cooled, dry sharpening system that uses maintenance free 150mm tempered glass wheels for adhereing PSA abrasives to
- Precise and repeatable sharpening port enables sharpening of 20, 25, 30, and 35 degree angles
- No jigs needed, just select angle and sharpen; lapping abrasive in sharpening port increases burr removal and speeds sharpening
- Forced air-cooling and the sharpening port heat sink allow for higher material removal rates without affecting the steel temper

PALMGREN 24" Disc Finishing Machine

Features:
- Production duty motor
- Direct drive design with oversized drive shaft and sealed bearings
- Fully enclosed adjustable guarding
- Adjustable table
- Safety electrical system: white power on light, green machine running light, drum start/ stop switch, on/off push button power switch with keyed lock-out, emergency stop button with electronic brake and 24 volts at all switches
- 3” dust collection port
- Heavy duty steel floor stand with hinged door, internal storage and anti-vibration foot pads
- 3 Year Warranty

Dake & Palmgren Ratchet Lever Arbor Presses

Palmgren Features:
- More clearance over table
- Higher Leverage
- Counter weighted for rapid handle return
- Features speed wheel
- 2 Year Warranty

Dake Features:
- Ratchet device permits lever to be used in the most convenient position
- Handwheel advances ram quickly to work
- Counter weight returns lever quickly after downstroke
- 1 Year Warranty

10 & 20 Ton Hand Hydraulic Presses

Features:
- Available both in the B-10 Bench Model and the F-10 Floor Model
- Furnished with a flat ram nose for pressing and a step reduced ram nose for bushing work
- Hydraulic pressing cylinder can be located right or left
- Adjustable table
- Table plates and v-blocks are also furnished for many other pressuring applications
- 1 Year Warranty

Force Model Features:
- Longer stroke for greater versatility
- Large diameter pump piston for rapid ram travel
- Pump is side mounted for ease of operation
- Made in Italy

25, 50, & 100 Ton Hydraulic Presses

- Heavy duty, American made 836, 3/8 gauge steel
- All welded frame construction with sliding head
- Pumps include safety overload valve and a bypass system which prevents the ram from being over extended and stops the press from going beyond its rated capacity
- Hydraulic gauge protects against shock load and measures US and metric tons of force applied to components being pressed
- 1 Year parts warranty

DAKE Air Operated Presses

Features:
- Air operation eliminates the need for hand pumping
- Safety valve protects against overloads
- Movable workhead is roller mounted on ball bearings for off-center work
- Rapid ram approach quickly moves ram to work to save production time
- Stroke indicator ensures accurate ram control
- By-pass hole eliminates excessive ram extension
- Adjustable table permits easy vertical movement by means of self-lockiong hoist

Standard Equipment:
- Frame
- 2 Steel V-Blocks
- Flat Ram Nose
- Stroke Indicator
- Safety Relief Valve
- Workhead
- 2 Steel Table Plates
- Pressure Gauge
- Self Lockiong Table Hoist

Electrically-Operated Hydraulic Press

Features:

- One hand ram positioning with throttling hydraulic valve control
- Force 40, 70 and 100 have rapid ram advance - speed shifts automatically when contact is made
- 40 and 70 ton models have two submersible centrifugal pumps, 100 ton model has three pumps
- All electrical controls are low voltage
- Made in Italy
- 1 Year Warranty

Elec-Draulic I Hydraulic Presses

Features:

- Single acting cylinder permits a pressing ram action, not retracting
- Rapid ram approach quickly moves the ram to work to save production time
- Variable ram speed allows precise control of ram travel and pressure
- Stroke indicator ensures accurate ram control
- Adjustable table with self-locking hoist
- Movable workhead is roller mounted

20 Ton Shop Presses

MADE IN THE USA

New!

- Compact and powerful
- Heavy duty 3/8" steel construction
- Cylinder with 2" Ram and 6-1/4" Stroke
- Rolling cylinder provides maximum versatility
- Working area of 10-1/2 x 20"
- Easy to use Hand/Jog Controls
- Quick Disconnect Hoses
- Hydraulic-Assist Table Height Adjustment
- Unique open sided design allows material to pass through the frame
- Power it up with an Edwards Ironworker with factory installed Hydraulic Accessory Pack or an Edwards Porta Power 5HP, 2750 psi portable power unit. Check out the 12" Press Brake Tooling, bump-die tooling, the 6 Piece Press Tooling Set and the Press Brake Back Gauge
- 1 Year Warranty

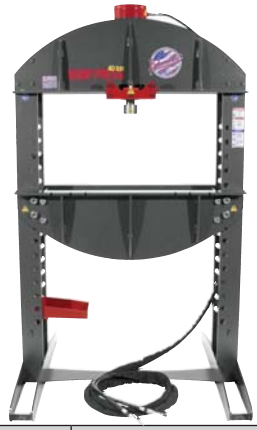
40 Ton Bench Model Presses

MADE IN THE USA

New!

- Rolling cylinder provides maximum versatility
- Unique open sided design allows material to pass through the frame
- Easy to use Hand/Jog Controls
- Quick connect hoses deliver "plug & play" operation
- Optional Tooling: Press Brake Tooling, 6 Piece Press Tooling Set, Back Gauge
- Models 4010, 4020 & 4030 include Portable Power Unit
- 1 Year Warranty



Model No.	Cylinder	Stroke (in.)	Working Area (in.)	Motor	Weight	Order No.	Price

60 Ton Shop Presses with PLC

- PLC provides added versatility and saves time
- Rolling cylinder provides maximum versatility
- Unique open sided design allows material to pass through the frame
- Convenient, effortless foot control for ease of use
- Quick connect hoses deliver “plug & play” operation
- Optional Tooling: Press Brake Tooling, 6 Piece Press Tooling Set, Back Gauge

Programmable Logic Control (PLC):

- Improve your productivity to 50%
- Provides adjustable up/down stroke control
- Adjustable PSI
- Magnetic control box mounts anywhere on the shop press

10 Ton Benders

MADE IN THE USA

- Plug + Play Operation
- Horizontal or Vertical Operating Positions
- Proximity Switch Allows Easy, Repeatable Bends
- Heavy-Duty Rolling Stand Easy-to-Use Hand/Jog Controls
- Quick-connect hydraulic tool to greatly expand your fabrication capabilities
- Designed for medium to heavy material, the Edwards 10 Ton Bender powers through 2" (I.D.) Schedule 40 pipe, 2-1/2" (O.D.) tube and 2" square tube quickly and accurately

Direct Drive Series Air Compressors

Features:

- Compact design and very lightweight
- Die casting aluminium pump with cast iron sleeve
- Thermal overload protection
- Oil-less means maintenance free, no oil required
- For home and farm applications

Model No.	Tank	Max PSI	Motor	Weight	Order No.	Price
LA5706	1.5 Gallon / Oil-Less Hotdog Tank	150	1.5HP Peak/1HP Running, 115V, 1PH	35 lbs	**PW40LA5706**	234.50

Contractor Series Air Compressors

Features:

- Direct drive unit has splash lubricated pump with cast iron sleeve for longer life
- Manual reset overload protection
- Dual Control Start/Stop Control with Pressure Switch or Constant Speed Operation for Electric Belt Drive Unit
- Idle Down Throttle Control For Gas Belt Drive Unit
- For farms and professional contractors

Single Stage Air Compressors

- Cast iron, twin cylinder, oil lubricated pump (models DXCMPA1982054, DXCMLA1983054 & DXCMLA3706056)
- Heavy duty induction motor
- Pre-attached pneumatic tires (models DXCMPA1982054 & DXCMLA1983054)
- Shipped with synthetic oil
- Quick set regulator, tank and working pressure gages, on/off switch (models DXCMPA1982054, DXCMLA1983054 & DXCMLA3706056)
- Integrated control panel includes: tank and working pressure gauges, air flow regulator, two quick connect air outlets and pressure relief valve (model DXCMLA4708065 only)
- Full metal belt guard (model DXCMLA4708065)
- UL & CSA certified
- ASME certified tank
- Two year warranty

Powermate Single Stage Air Compressors

PT60-PLD1581519 Features:
- 200 Max PSI for longer air tool run times and increased project efficiency
- Long life oil free pump
- 7” wheels for shop/job site protability

PT60-PP1682066MN Features:
- One-piece cast iron crankcase
- Thermally stable cast iron cylinder body
- Aluminum head and machined cast iron valve plate
- Durable stainless steel reed valves
- Oil level sight glass
- Easily accessible oil fill
- 10” cast iron balanced flywheel
- Heavy duy induction motor
- Dual voltage motor wired for standard 120 volt
- Equipped with quick-set regulator, tank and tool pressure gauges, quick connect air outlet and on/off switch

PT60-PLA4708065 Features:
- High air flow,
- Cast iron, three cylinder, oil lubricated pump
- Heavy duty, 240 volt induction motor
- Large capacity, 80 gallon ASME air receiver
- Wired formed belt guard for more efficient cooling
- Shipped with synthetic oil

PT60-PLA1683066 Features:
- Heavy duty induction motor
- Portable tank equipped with pneumatic tires
- Dual voltage motor is wired for standard 120 volt outlet
- Fully assembled and equipped with quick-set regulator, tank and tool pressure gauges, quick connect air outlet and on/off switch

PT60-PLA3706056 Features:
- Cast iron twin cylinder pump
- Heavy duty induction motor
- Shipped with synthetic oil for optimum performance and long life
- Equipped with pressure gauge and on/off switch

Hi-Flo Single Stage Cast Iron Air Compressors

- High air flow, single stage - 14 CFM @ 90 PSI
- Cast iron, three cylinder, oil lubricated pump features
- One-piece cast iron crankcase
- Full cast iron cylinder body
- Durable Swedish stainless steel flex leaf valves
- Oil level sight glass
- Easily accessible oil fill
- 12” Cast iron balanced flywheel
- Large intake filter/silencers
- Heavy duty induction motor
- Shipped with synthetic oil
- Wire formed belt guard for more efficient cooling (Models ILA4546065 & ILA4708065.01)
- Full metal guard (Model ila4708065)
- UL & CSA CERTIFIED
- ASME certified tank
- Two year limited warranty

- Oil level sight glass (Model ILA3606056)
- Easily accessible oil fill (Model ILA3606056)
- 12” Cast iron balanced flywheel (Model ILA3606056)
- Heavy duty induction motor
- Shipped with synthetic oil (Model ILA3606056)
- Equipped with pressure gauge and on/off switch
- Single stage, oil lubricated, belt drive technology (Model IL3106016)
- Long lasting twin cylinder pump combines cast iron cylinders with aluminum cooling fins to reduce heat, maximize CFM, and extend pump life (Model IL3106016)
- Splash type lubrication (Model IL3106016)
- Flex leaf valve system (Model IL3106016)
- UL & CSA CERTIFIED
- ASME certified tank
- Two year limited warranty

Professional Series Single Stage Air Compressors

Features:

- 100% Durable Cast Iron Pump
- Splash Type Lubrication
- Swedish steel valve for long life
- Manual Reset Overload Protection
- ASME approved tanks
- For professional and automotive use

BURR KING VibraKing® Mass Finishing Bowls

Features:

- Built-in flow-through drain for use wet or dry
- 1/10HP Motor has adjustable amplitude to provide a range of finishing needs from gentle to aggressive and is ideal for small parts
- Runs on 115 Volt/1 phase

Burr King will run your parts and return to you a finished part with media recommendations, machine, and a time study. Call for details.

BURR KING VibraKing® Stand Pak 5000

The Perfect Mate for Burr King Model, 150S and 200S Vibratory Bowls

- Filter Pak 4000 may be mounted internally for full flow through system
- Built in 0-6 hour process timer with "Hold On" function
- Built in duplex, 115 VAC 10 Amp receptacle timer controlled
- Easy open access panel
- Heavy steel construction provides a solid base for good vibration action
- Space saving 16" x 20" x 21" size
- Shipping weight: 60 lbs.
- Complete with power cord and plug

KALAMAZOO Industries Inc. Vibratory Finisher

Features:
- 3.3 Cubic ft., 50 capacity
- Motor 1 HP, 110 V, 1 PH
- Steel tub with cast urethane lining
- Vibra action rotates media
- Quiet operation
- 500 lbs. Capacity
- Compact design
- Rugged construction
- Portable - on wheels
- Easy to load and unload
- Weight 640 lbs.

SPEED BLASTER GRAVITY FEED MEDIA BLASTER Gravity Feed High Efficiency Blaster

- Powerful, hand held & easy to use
- Fully adjustable material control valve meters sand flow precisely
- Gravity forces the particles into a hardened steel mixing chamber, where they practically hit warp speed passing through a space age ceramic nozzle
- Adjustable sand flow
- Ceramic nozzle
- Safety vented tank
- Replaceable hardened steel mixing chamber
- Medium to fine abrasive sand
- Cannot use glass bead

Order No.	Price
PA55007R	129.45

SHOP FOX 20 Gallon Portable Sandblaster

Specifications:
- Max. pressure: 60-125 PSI
- Blasting hose length: 8’
- Tank size: 20 gallons
- Fill port: 1”
- Tip bore sizes: 9/64”, 1/8”, 7/64”, 3/32”
- Approximate shipping weight: 45 lbs.

Includes:
- Heavy-duty feed hose, fittings, pressure gauge, pressure relief valve, blasting hood, funnel & four ceramic replacement tips

Order No.	Price
PY65M1115	335.00

TRINCO™ Master Model Dry Blast Cabinets

- Master Models with the BP-2 100 CFM Dust Collectors are designed for intermittent blasting operations or for light to medium amounts of blasting
- BP Dust Collector vacuums the dust and contamination form the cabinet
- Media is then recycled from the gun system to the hopper and back to the gun system
- The BP-2 Dust Collector is well suited for most types or media
- Fluorescent lighting to eliminate shadows and minimize energy consumptio.
- Large 12” x 24” safety glass windows for excellent visibility and increased efficienc.
- Air pressure regulator and gage
- Double floor 1/8” expandex steel plus carbon screen
- Come with standard BP-2 100 CFM dust collector
- 1 Year Warranty

TRINCO™ Deluxe Blast Cleaning Systems Dust Collectors

Provides Superior High Efficient Dust Filtration

- Available on Master Models 36 and larger
- These units are equipped with 600 CFM abrasive separator
- Features include superior dust filtration, a drawer for dust disposal and a shaker mechanism for efficient bag cleaning (16 tubular filter bags) which replaces standard dust bag on abrasive separators, air vibrator, water filter, and blow off gun
- 400 CFM pull through enclosed dust collector
- 1 Year Warranty

TRINCO™ Master Model Dry Blasters With Abrasive Separators

- Designed to keep media free of contaminants
- During blasting, media is suctioned into the abrasive separator, where the dust and contaminants are removed and exhausted into a filter bag
- The cleaned media then returns to the cabinet for reblasting.
- Ideal for blasting painted, rusted, and corroded parts.

300 CFM Abrasive Separator

- Is available on Models 36 through 48” x 24” Split Level
- Is suited for medium to heavy amounts of blasting where media separation is needed
- Is suited for use with glass beads or other “fine” media only

600 CFM Abrasive Separator

- Is available on Models 40” x 40” Split Level and larger
- Is suited for medium to heavy amounts of blasting where media separation is needed
- Is suited for use with most types of media including glass beads and aluminum oxide
- 1 Year Warranty

450 CFM Abrasive Separators

- Available for all Models 36 through 48 x 30 Split Level Balsters and used in medium to heavy blasting where seraration is needed and can be used with Glass Beads or Aluminum Oxide. Call for Details.

TRINCO™ Dry Blast Media

TRIN-MIXES: Trinco's exclusive combination of glass bead and aluminum oxide delivers fast and efficient cutting action while maintaining close tolerance and a fine satin finish.
TRIN-MIX #4: The finest, it is ideal for removing light-to-medium contamination from tools, precision parts, molds, and dies. A general purpose media which is used in a wide range of applications from texturing plastic injection molds to providing appealing finishes on exposed stainless steel and aluminum surfaces.
TRIN-MIX #2: More aggressive and faster cleaning, Trin-Mix 2 leaves a slightly rougher finish. Ideal for heavier contamination. Dimensional changes of .001 may occur.
RAD-MIX: Most aggressive. Developed for radiator cleaning. It is ideal for removing tough contamination from surfaces with a minus .001 inch tolerance or better.
NUT SHELLS: Soft aggregate used in removal of foreign matter or coatings from surfaces without etching, scratching or marring cleaned areas. Applications include delicate molds, armatures and electric motors prior to rewinding.
SILICON CARBIDE: Extremely hard but friable abrasive used in blasting, grinding and polishing very hard materials, i.e. granite, ceramics, glass, marble. May be used on soft resilient plastics. Meets ANSI standard B74.12-1976. It comes in a full range of sizes.
TRIN-BLAST ALUMINUM OXIDE: The fastest abrasive for general blasting, dimensional changes of .001 to .002 may occur. Guaranteed First Quality Virgin Grain meets ANSI standard B74.12-1976, Military Standard A21380-B. Consistent, resistant to breakdown, very low iron content. It comes in a full range of sizes.
TRIN-BEADS GLASS BEADS: Ideal for removing foreign matter from workpiece, without removing base metal, changing dimensions, contaminating parts or overstressing. Full range of sizes are available.
- 50 Lb. box sizes

Leveling Jacks

Wedge Action Leveling Jack Features:

- Lower surface of wedge is specially contoured to float laterally within concave base unit, automatically conpensating for uneven floor conditions up to 5° of slope
- Wedge action allows easy adjustment of height (1/4” - 3/8”) with the turn of a wrench
- Two-piece design that provides solid support from 3,000 to 9,000 lbs./ft.
- Low-profile leveling jack is ideal for applications constricted by reduced height

MADE IN THE USA

Vertical Motion Leveling Jack Features:

- Three-piece design combines the advantages of a wedge-action jack with vertical lift capabilities in one unique and practical unit
- Level and support up to 30,000 lbs./ft.
- For precision machine leveling and support

UNISORB® Level-Rite® Machinery Mounts For Hollow Base Machines

- Designed for hollow bases as found on certain models of mills, lathes, grinders and other machines
- Provides vibration control, leveling and support
- Pads are made from engineered felt to reduce vibration and noise
- Pads provide an extremely high coefficient-of-friction between the pad and the floor surface to provide maximum protection against machine movement without physical anchoring
- Pads are unaffected by oils and solutions used in manufacturing plants

MONROE Leveling Pads

MADE IN THE USA

Socket Type Features:

- Leveling pads swivel 10° each side of the centerline to adjust to uneven surfaces
- Large-diameter pad design assures solid support
- Hardened ball prevents galling and forms to its own seat
- Zinc plated and gold plated to resist rust

Stud Type (with Jam Nut) Features:

- Offering many leveling applications, the integral stud allows vertical adjustment to compensate for uneven floors
- Jam nut secures the adjustment
- Pad swivels 10° in all directions and automatically adjusts to uneven surfaces
- Pad is zinc plated and gold plated to resist rust

Bridgeport by HARDINGE Down Feed Handle Assembly

- Heavy-duty—will not bend or break
- Replacement for conventional down feed handle
- For J or 2J style machines

Order No.	Price
RL352201033	64.32

Quill-Feed Speed Handle For Bridgeport Milling Machines Only

Does not fit Import Mills

- Time-saving accessory for Bridgeport operations
- No more pulling off and resetting the quill-feed handle for any repositioning
- Flick of the wrist retracts pin from index plate of the quill-feed mechanism and lets you move handle into any desired position
- Speeds operations considerably
- Replaces conventional feed handle in seconds
- No holes to be drilled
- Heavy duty construction, handle will not bend or break

Order No.	Price
NB80Z9900	50.15

"Twin-Grip" Quill Feed Speed Handles

- Eliminate the need to pull off and reset the quill feed handle
- A simple turn of the hand will retract the pins from the index plate of the quill feed mechanism and lets the operator move the handle into any desired postition
- Replace standard feed handles within seconds
- No holes to be drilled
- Rugged all steel construction
- 5 Year Warranty

For Use With	Order No.	Price
Atlas Clausing, Acra, Chevalier	**RL400837**	55.55
Bridgeport	**RL401021**	36.90
Bridgeport Series 4HP	**RL400875**	148.80

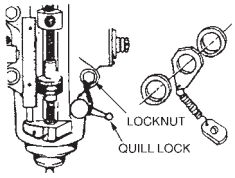
The Educated Nut

- Adjust your quill depth in seconds with our depth stop nut
- The push button releases the nut for repositioning, .001" micrometer adjustments by rotating the nut
- A proven time-saver — 8 hours or more per month
- Easy installation — fits domestic or imported mills with 1/2-20 threaded stop rod

Order No.	Price
SG801220	56.55

Quill Free

- Economical way to prevent the quill lock handle from falling and putting drag on the quill
- Provides positive lock engagement and eliminates all drag
- Strong spring and custom hardware included



Order No.	Price
NB80Z8700	16.75

R8 Right Angle Attachment

- Designed to simplify right angle work by reducing the need of special tooling and difficult fixturing, ideal for cavities and pocket jobs
- Ductile Iron Body
- Precision Hardened & Ground Spiral Bevel Gears
- Sealed High Speed Bearings
- 1.33 to 1 Gear Ratio
- Grease Fitting
- Alignment Flats on 2 Sides
- R-8 Spindle to fit Collets and/or Arbors
- Drawbars sold separately
- For 3-3/8" quill
- 4140 Material

Order No.	Price

MADE IN THE USA	Z9006	**NB80Z9006**	30.35
WORLD CLASS QUALITY	QS1	**NE60QS1**	16.45

Center It

- Enables the drilling of round pieces parallel & centered
- 7/16" Groove with 118° angle lets you bottom drill bit to center v-block and bolt in place
- 5"L x 4"W x 1-3/4"H
- Grooves on the outer sides eliminate slippage

Order No.	Price
HT60CIT	22.25

Swing-Away Adjustable Safety Guard

- Designed specifically for use on mill/drill machines, vertical turret milling machines and larger size drilling machines
- Shields are intended to deliver protection by deflecting chips, sparks, coolant or lubricants away from operator
- Unit is made of strong cast iron brackets and high impact polycarbonate
- Height clearance is easily adjusted with convenient locking knobs located on the mounting bracket
- Large shield easily swings in or out
- Size: 16"L x 13.5"W x 8"H
- Weight: 9 lbs.

Order No.	Price
PR6915035	163.05

Maxi Torque-Rite Power Drawbar Kits

- Fits Bridgeport and all similar milling machines
- Installs in just minutes on most machines with R-8, taper spindle
- Changes a tool in seconds
- Can deliver 40 to 50 foot/lbs.of torque, not 15 to 25 like the competition
- Will virtually eliminate tool slippage in collets on heavy cuts
- 1 Year Warranty
- **Kit Includes:** air filter, regulator & lubricator, drawbar, extra long air hoses, and all mounting hardware

Phase-A-Matic Static Phase Converters

MADE IN THE USA

Runs Motor Loads Only at 2/3 Rated HP

How To Size:

- The largest motor on your machine must fall within the minimum and maximum range of the converter
- Do not order a larger unit or heavy duty model thinking it will give more horsepower

When To Use Heavy Duty:

- Heavy starting loads (lathes, flywheel driven equipment,etc.)
- Instant reversing, frequent starting, jogging
- Air compressors (motor pulley must be reduced by 1/3 in diameter)

Heavily Loaded Equipment:

- For pumps, fans, blowers, direct-drive compressors, or equipment requiring greater than 2/3 of its rated HP, you must USE A PHASE-A-MATIC™ ROTARY CONVERTER.

Type - Regular Duty Static Phase Converter				
Model No.	**HP Range (in.)**	**Weight**	**Order No.**	**Price**

MADE IN THE USA Phase-A-Matic Rotary Phase Converters

Full Power Converter - Resistive & Motor Loads

Features:

- Heavily loaded applications
- Multi-motor operation
- Multi-speed applications
- No changing motors or switch gear
- Full 12 month warranty
- Easy to install
- No interference to TV, Computers, etc.
- In stock for immediate delivery
- For larger sizes or 460V operation, consult factory
- Heavy load applications also 460V models

R2

NOTE:

- For long, heavy starting loads, instant reversing, momentarily overloaded motors, or imported equipment, contact factory, or refer to Application Guidelines RTN.
- Voltage Stabilizer available for high line voltage & voltage sensitive equipment such as CNC/PLC 's

F.O.B. Palmdale, CA

MADE IN THE USA Phase-A-Matic Voltage Stabilizer

- For CNC and other voltage sensitive equipment
- A Voltage Stabilizer, Rotary Converter COMBINATION, when properly sized, provides the necessary voltage balance of close to +/-5% or less between legs and helping to keep output voltage stable during peak loads, helping CNC and other voltage sensitive equipment to operate properly
- Most CNC machines require a Voltage Stabilizer, Rotary Converter COMBINATION sized 1-1/2 to 2 sizes larger than the spindle motor to accomadate the extra amps for starting, instant reversing, and for the servos, hydraulics, etc

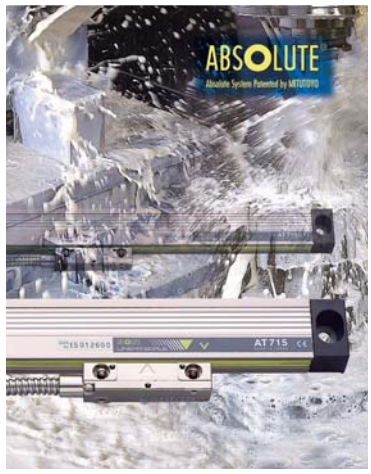
Mitutoyo AT715 IP67 ABS-DRO Systems

with Submersible Oil and Coolant Proof Magnetic Scales

- Use a new Electromagnetic Induction Detection method for improved reliability and contamination protection
- True Absolute Scale Technology means your original part datum point is never lost, even after power down.
- Increased production by putting the coolant where it's needed, without having to worry about scale damage
- Less downtime for maintenance.



Mitutoyo Absolute DRO System Lathe Packages

- KA-200 counter
- AT116 and AT715 linear sclae combinations (with cables)
- Mounting bracket kit
- Counter tray
- Additional extension calbe (2m) include in 60" and 72 " packages
- 5 Year Warranty

NEWALL NMS800 Digital Readouts

- NMS800 DRO Display - 2 Axis
- Encoder Assemblies
- Spherosyn Serial Reader Heads
- Spherosyn® Serial Scales
- Scale Support Brackets
- Mounting Bracket Kit
- Display Moutning Arm
- NMS800 Features
- Datum preset/reset
- Inch/mm
- Abs/Inc
- Ref location
- 1/2 Function
- Linear and segmented error comp per axis
- Radius/diameter axis setting

New!

- RPM display for rotary encoder input
- Standard calculator functions
- Tool change (new operation); Sets the current tool type, offsets, diameter, etc
- Display message (new operation);Will display a text message to the screen (mainly for use in Jobs)
- Bolt hole/PCD;Selectable start and end angle (for full or partial circles)
- Line/Grid; Selectable angle; Selectable number of holes X direction (line); Optional number of holes Y direction (grid)
- Arc contour/Incline; Selectable plane (X-Y, Y-Z, X-Z); X-Y plane would be like current Arc contour; Y-Z and X-Z would cover incline (arc going up instead of flat)
- Taper calculator
- Slot; Selectable start point, orientation (X or Y axis) and length; Slot width determined by current tool diameter
- Pocket/Island; Selectable width, height and location; Pocket will compensate tool inside W and H; Island will compensate tool outside W and H
- Lathe vectoring

ACU-RITE® Precision Glass Scales

SENC 150 PRECISION GLASS SCALES:

- The SENC 150 precision glass scale, designed to satisfy a wide range of application needs, incorporates the latest innovation in roller bearing technology for reduced backlash and greater scale travel life
- It also features a highly integrated scanning sensor that provides superior contamination resistance
- Scales 65" and over include Backup Spars
- Scales over 42" may require Extension Cables
- Note total overall scale length equals measuring length plus 6.375" (161.9mm). Actual Travel is 1-3/4" Longer than the Measuring Length. Except the 32" scale which has a total travel of only 31.125".

Features:

- Resolutions of .00005" (1µm) and .0002" (5µm)
- Travel lengths from 2" - 120"
- Reader Head and Armor Cable
- Vinyl cable available
- Flexible mounting features
- Position-Trac™ Home Reference System
- 2 Year Warranty

From the moment you power up your MILLPWR$^{G2®}$ system, you'll know it was built with convenience in mind. From the exceptional clarity of a large full-color LCD display to the added advantage of full 3D contouring capabilities and menu-prompted conversational programming, essential functions are only a key stroke away. Use MILLPWR$^{G2®}$ as a full function digital readout system, a programmable CNC control or both. It's powerful enough to handle any job and easy enough for anyone to operate. No prior programming experience necessary.

ACU-RITE® Interface Cables for Scales & Consoles

- Used to run SENC 150 Scales with old systems and old scales with different consoles
- 2 Year Warranty

MADE IN THE USA

Description	Comments	Order No.	Price
D9 to D9 Interface Cable	Used to interface Millmate or TurnMate scales with a VUE or 200S for Milling, Turning and Grinding Readout	**MS30385210103**	104.55
D9 to MS Interface Cable	Used to interface an SENC 150 Scale with an ACU-RITE II, ACU-RITE III, Qwikcount, Master-G, Master-MP, Master-TP, Turnvision or MillVision Readout	**MS30385210102**	104.55
Digital to Analog Interface Cable	Used to interface Millmate or Turnmate with 5um SENC 150 (note this cable will only work with 5um SENC 150 Scales)	**MS30385210104**	91.15
MS-D9 Differential Signal Interface Cable	Used to interface Mini scales, Old AR-5 Scales or Old AR-10 PLUS Scales with a VUE, 200S, DRO 200E or 300S Readout	**MS30385210101**	104.55
